PREFACE BY THE KEEPER OF COINS.

THIS volume of the Catalogue of the Greek Coins in the British Museum describes the money of Troas, Aeolis, and Lesbos, districts which formed part of the Roman Province of Asia.

The size of the coins is given in inches and tenths, and the weight in English grains. Tables for converting grains into grammes and inches into millimètres, as well as into the measures of Mionnet's scale, are placed at the end of the volume. A map has been prefixed, showing in red letters the position of the cities that issued coins.

In the Introduction, a sketch of the numismatic history of Troas, Aeolis, and Lesbos has been attempted, and, so far as is compatible with limits of space, reference is made to such details in the history, geography and religion of the towns as serve to throw light upon the coinage. The Notes deal briefly with questions of *provenance*, attribution, reading and types; but some of the more important types and attributions are discussed in the Introduction.

The whole work has been written by Mr. Warwick Wroth, F.S.A., the Senior Assistant in the Department of Coins and Medals. I have carefully read the proof-sheets, and have minutely compared each coin with the description in the text.

INTRODUCTION.

PART I.

COINAGE OF TROAS.

THE coinage of the numerous towns of the Troad* belongs mainly to the fourth century B.C. and to the latter part of the fifth century. Early coinages (of the sixth century B.C.) have been attributed to Abydus, Cebren, Dardannus, and Zelsia, but in none of these cases can the attribution be considered as indisputable. The close of the fourth century is marked in the Troad by political change and by frequent migrations of the urban populations. These movements are reflected in the coinage, and will be more readily apprehended if, in this Introduction, we arrange the towns of the Troad in three or four groups, suggested by geographical proximity or by identity of political fortune.† The first group—the Alexandria-Troas group—consists of towns whose inhabitants, after the permanent or temporary loss of their autonomy, were removed to form the population of the important town of Alexandria Troas (Antigoneia). The second group embraces the city of Ilium and towns in its

* See Index I. (Geographical) and the map at the beginning of the volume. The coinages of twenty-three towns (not including Tenedos) are extant. All these, with the exception of the currency of Rhœteum, are represented in the British Museum.

† In the Catalogue *infra* the towns are, for convenience of reference, arranged alphabetically.

neighbourhood, two of which—Gergis and Rhoeteum—were *circ.* b.c. 180 annexed by the Romans to the territory of Ilium. The third group consists of Assus and the neighbouring towns of the southern Troad. The city of Abydus is somewhat isolated, though in the time of Alexander's successors it is brought into relations with its neighbour Dardanus. Zeleia and Tenedos—from their geographical position—and the towns of Birytis and Gentinus (the sites of which remain unidentified) cannot well be included in any of the above-mentioned groups.

ALEXANDRIA-TROAS GROUP.

Alexandria Troas, now *Eski Stambul*, was founded about b.c. 310 by Antigonus, who brought thither the inhabitants of Cebren, Colone, Hamaxitus, Neandria and Scepsis. The city at first bore the name of Antigoneia, but about b.c. 300 was improved by Lysimachus and re-named Alexandria, in memory of Alexander the Great.

No coins of the place inscribed with the name of Antigoneia are known to exist, and it is therefore probable that the money of the various populations that had been drafted thither—especially the money of Hamaxitus and Neandria—continued to circulate in the newly-founded city.

The earliest coins bearing the name of Alexandria are bronze pieces struck *circ.* b.c. 300 (Pl. iii. 6-8), and imitated from the latest autonomous money of Hamaxitus (Apollo Smintheus) and Neandria (Apollo, *rev.* Horse feeding).*

The earliest specimens in silver attributable to Alexandria are tetradrachms of Antiochus II. (b.c. 261-246), with mint-mark a feeding horse (Gardner, *Brit. Mus. Cat., Seleucid Kings*, p. xxx.;

* Sestini (*Mon. Heterovar.*, ii, p. 139, no. 2) publishes a Neandrian coin of these types stamped with the countermark **ΑΛΕΞΑΝ** which shows that the Neandrian coins circulated at Antigoneia even after its name had been changed to Alexandria.

p. 14, nos. 5, 6, 7; Babelon, *Rois de Syrie*, p. lvi.; pp. 29, 30). Alexandrine tetradrachms with the same mint-mark are also attributed to Alexandria by L. Müller (*Num. d'Alex.*, nos. 923, 924; pp. 236, 237), who, however, seems wrong in assigning them to the reign of Antiochus II. instead of to the period after the battle of Magnesia, circ. B.C. 189.

Probably about the same time as the town of Ilium, Alexandria began to issue tetradrachms (Pl. iv. 1, 2) and drachms* of Attic weight bearing the image of Apollo Smintheus. These coins are

Dated coinage. dated; the earliest date, so far as we know, being Era B.C. 312 or "137,"† the latest "236." According to the B.C. 300 † conjecture of Spanheim, which most later writers

have adopted,‡ the Era from which these dates are reckoned is B.C. 300, the year (probably) in which Lysimachus changed the name of the city from Antigonia to Alexandria. In accordance with this theory, the dates "137" and "236" would respectively correspond to B.C. 164 and B.C. 65. If, however, as De Witte has suggested (*Rev. num.*, 1858, p. 49), the coins are dated according to the Seleucid Era (B.C. 312), the dates "137" and "236" would be equivalent to B.C. 176 and B.C. 77. If this latter Era be accepted—as I am inclined to think it should be—it will follow that the coinage of these tetradrachms and drachms came to an end almost at the same time as the corresponding coinage of the Bithynian Kings. The latest tetradrachm of Alexandria (year "236" = B.C. 77) bears, in fact, a close resemblance to the latest Bithynian tetradrachms, issued in B.C. 74 (*Brit. Mus. Cat.*, *Pontus*, p. 215, no. 8).

In the time of Augustus, Alexandria Troas became a *Colonia*.

* For drachms, see *Zeit. f. Num.*, iii., p. 305; pl. viii. 12; cp. Imhoof, *Mon. gr.*, p. 261; *Z. f. N.*, xv. (1867), p. 42, Loebbecke.

† Longpérier in *Rev. num.*, n.s. 1859, p. 115; pl. iii. 3.

‡ Eckhel, *Doct. num. vet.*, ii. 481; Leske, *Num. Hell. As. Gr.*, p. 6; *Hand Hist. num.*, p. 469; cp. De Witte in *Rev. num.*, 1858, p. 49.

It was one of the chief towns of the Troad under the Empire, and the place of embarkation and arrival for voyagers between Macedonia and western Asia Minor. Its colonial **Colonial coinage.** bronze coinage* belongs principally to the period extending from Commodus to Gallienus, and the types chiefly relate to Apollo Smintheus,† whose temple (originally in the territory of Hamaxitus) lay at a short distance from the sea-shore, twelve geographical miles south of Alexandria Troas‡ (cp. Pl. v. 5, 18; vi. 1, 9).

In addition to colonial types of the ordinary character, such as the Wolf and Twins (Pl. v. 2) and the Marsyas statue of the Roman Forum (Pl. v. 9; vi. 8; p. 19, no. 78, note), an Eagle holding in its talons the head of a bull (Pl. v. 1), and a Horse feeding (Pl. iv. 10, 11, 12) often occur. Both these types seem to refer to local legends, and may be best discussed in connexion with the types relating to Apollo Smintheus.

The representation of Apollo Smintheus, both on the autonomous **Types relating to** and colonial coins, presents few variations in essen- **Apollo Smintheus.** tial points (see e.g. Pl. iii. 6; iv. 1, 5; v. 3, 4, 12, 13; vi. 9; cp. Pl. xi. 2). The figure wears a himation, and carries on his shoulder a quiver; in his outstretched right hand is a patera; in his left, a bow. The statue is usually placed on a pedestal, and the patera is held over a flaming tripod (Pl. v. 4). There can be no doubt that these types reproduce the cultus-statue in the Sminthion. According to Strabo,§ this statue was the work of Scopas, and the emblem of Apollo Smintheus—the mouse or rat—was represented

* For exceptional specimens in gold, see *infra*, p. 12, no. 37, Caranalla; and Babalon in *Rev. num.*, 1885, p. 28 ff., Gallienus.

† On Apollo Smintheus, see De Witte in *Rev. num.*, 1858, p. 1 ff.

‡ On the remains of the temple, see Spratt and Leake in *Transactions of the Royal Society of Literature* (London), 2nd Ser. v., p. 236 ff.; Pallan, in *Antiquities of Ionia*, pt. iv., p. 40 ff.

§ Strabo, xiii., p. 604; Overbeck, *Schriftquellen*, nos. 1168-1170.

beneath the foot of the god. The mouse appears on the bronze autonomous coins (Pl. iii. 6), but not on the later specimens.* The facing types (Pl. iv. 6; v. 4, 13; Overbeck, *Kunstmythol.*, "Apollo," Münztaf. v., no. 33) show distinct traces of archaism, which, as Gardner,† Furtwängler,‡ and Weil§ have pointed out, it seems impossible to reconcile with the style of Scopas, unless indeed we suppose he was merely reproducing an older temple-statue, to the general character of which he was compelled to adhere. Furtwängler and Weil are rather inclined to recognize the statue by Scopas in the coins represented in Pl. iv. 8; v. 15; vi. 2, 5. On grounds of style this identification may seem probable; but, on the other hand, it appears to me to be negatived by the absence of the distinctive emblem—the mouse—and the presence of another Apolline emblem—the raven (Pl. vi. 2), and also by the circumstance that this type is not confined to the coins of Alexandria Troas, but appears also on the Mysian coinages of Apollonia ad Rhyndacum and of Cyzicus.||

On some specimens (e.g. Pl. v. 14)** the statue of Apollo Smintheus surmounts a cavern, within which another precisely similar statue is seen lying flat on the ground. Before the cavern stands a herdsman with his right hand upraised, either as a gesture of adoration or surprise. On the right, a bull is seen running away, as if terror-

* The mouse does not appear on the bronze coin of Hamaxitus (Pl. xi. 2), the earliest Troas coin on which the type of Apollo Smintheus appears. — An autonomous bronze coin of Alexandria Troas (middle of first century B.C.) has a mouse and a head of Apollo as countermarks: Imhoof-Blumer, *Griech. Münzen*, p. 623, no. 206.

† *Types of Greek Coins*, pp. 176, 177: see also Overbeck, *Kunstmythol.* "Apollo," Pl. v., nos. 25-36, pp. 91-95.

‡ Furtwängler, *Meisterwerke der griech. Plastik*, p. 524; and ref. to Roscher's *Lexicon*.

§ Weil in Baumelster's *Denkmäler*, iii., pp. 1669, 1670.

|| See p. 24 *infra*, note to no. 121 of Alexandria Troas.

** See also Imhoof-Blumer, *Griech. Münzen*, p. 623 f.

stricken, with its head turned back towards the cavern.* It would seem that some local legend connected with the discovery of the statue of the god is here portrayed. The engraver appears to have naively blended two incidents of the legend—first, the chance finding in a cavern of the statue of Apollo Smintheus by a herdsman—next, the setting-up of the statue for worship in a place of honour over the cavern. On other coins of Alexandria Troas, a herdsman—who is evidently the same herdsman—is represented in the presence of a divinity who appears to be Apollo (Imhoof-Blumer, *Griech. Münzen*, pp. 625, 626; Pl. vii. 25, 26), and he often appears standing beside the feeding horse that occurs frequently as a coin-type of Alexandria Troas (Pl. iv. 12; v. 7; vi. 12).

The feeding horse† (Pl. iv. 10, 11; vi. 19) first appears on the autonomous coins of Alexandria Troas (Pl. iii. 7 (*circ.* B.C. 300); Pl. iii. 9-14), and is itself derived from the feeding horse on the coins of Neandria, *circ.* B.C. 400-310 (Pl. xiv. 1).‡ On the fourth century coins of Larissa in Thessaly the animal seen feeding is one of the famous Thessalian horses, but it is difficult to determine its significance at Neandria. Cavdoni (*Spicil.*, p. 151) suggests that it is one of the horses of Erichthonius, father of Troas.§

The type of an eagle holding a bull's head in its talons (Pl. v. 1) has been explained by Leake (*Num. Hell.*, As. Gr., p. 7), following Eckhel (*D.N.F.*, ii., p. 482), as referring to some foundation-legend

* Cp. p. 19 *infra*, note to no. 80.

† On one of the autonomous bronze coins of Alexandria Troas the horse is feeding before a palm-tree (Imhoof-Blumer, *Mun. gr.*, p. 261, no. 165).

‡ A feeding bull is the type of the earlier coins of Gargara: see p. 52 *infra*, nos. 1, 3.

§ M. Babelon is of opinion (*Rois de Syrie*, pp. xxxvi., xxxvii.) that a (wingless) Pegasus, drinking, is represented; but the analogy of the coins of the Thessalian Larissa, and of Gargara (feeding bull), the representation of grass beneath the horse on no. 7 in Pl. v., and the absence of wings seem to me to be obstacles to this explanation.

of the same character as the legends told of the Syrian Antioch and Nicomedia, according to which, when a founder (*i.e.* Seleucus I. and Nicomedes I.), "undetermined as to the site of his intended city, was sacrificing to some deity, an eagle carried away the head of the victim and deposited it on the future site."* From the appearance of this type as a *symbol* in the "field" of certain coins (*e.g.* Pl. vi. 10) representing the Emperor sacrificing to Apollo Smintheus, it may be inferred that the foundation-legend of Alexandria Troas was in some way connected with that divinity.

Cebren—a town in the district Cebrenia—is identified by Calvert (*Archaeological Journal*, xxii. (1865), pp. 51-57) with a site on the hill of *Tchali-Dagh* ("Bush Mountain"), three miles S.S.E. of Turkmani, and nine miles S.W. by W. from Baïramitch. The remains are those of a considerable fortified town, and the walls of part of the acropolis are of a "Cyclopean" character.† While at this place, Mr. Calvert procured seventy-one coins (found on the site or in the neighbourhood), of which no less than twenty-five were of Cebren itself.

The attribution of several of the coins assigned to Cebren in this *Catalogue* is conjectural (see p. 42 *infra*), though they bear the type of the city—a ram's head (Pl. viii. 6-8). No. 1 (p. 42), a stater resembling some of the coins that occurred in the Santorin Hoard, is assigned to Cebren on the suggestion of Mr. Head (*Cat. Ionia*, p. xxxiii., "Cebrenia, or possibly Clazomenae"). If this attribution is correct, Cebren must have begun to issue money at the beginning of the sixth century *a.c.*, an unusually early period for coinage in the Troad. Silver coins with the type of a ram's head and incuse square reverses (Pl. viii. 6-11) apparently belong to the period *a.c.* 500-400. In *a.c.* 447 the Cebrenians were assessed in the Athenian Tribute

* Cp. Wroth, *Brit. Mus. Cat. Pontus, &c.*, p. 11; p. 130, no. 62; Pl. xxxiv. 16.

† Cp. Xen., *Hell.*, iii. 1, 17.

Lists at about three talents, and in B.C. 443 at six talents, an assessment which shows that it was a tolerably wealthy town.* After the overthrow of the Athenian domination Cebren fell under Persian influence, and its government was entrusted by Pharnabazus to Zenis of Dardannus as satrap under him, and afterwards to Mania, the widow of Zenis (*circa* B.C. 400). The type on the bronze coins (B.C. 400-310) of a youthful head in a Persian head-dress wreathed with laurel (Pl. viii. 16) is significant of a period of Persian government—either the time of Mania, or the epoch after the Peace of Antalcidas (B.C. 387), when the Troad again fell under Persian rule.† The head of Apollo also appears on coins of this period.

About B.C. 310 Antigonus removed the inhabitants of Cebren and Scepsis—the two places being constantly at variance with one another—to his new town Antigoneia, subsequently called Alexandria Troas.‡ With this event the silver and bronze coinage bearing the name of Cebren would seem necessarily to come to an end.

The bronze coins catalogued on p. 46 *infra*, nos. 37-40 (Pl. viii. 21-23), and others described by Dr. Imhoof-Blamer

Coins inscribed
ANTIOXEΩN (*Z. f. N.*, iii. 305-307), are inscribed ANTIOXEΩN,
but so closely resemble in types and style the

latest bronze pieces bearing the name of Cebren, that there can be no reasonable doubt that they were struck at Cebren itself shortly after the money inscribed with the name of that town. That these coins could not have been issued, however, by the Cebrenians themselves appears clear from Strabo (p. 597), who distinctly says that the Cebrenians, after having been transferred by Antigonus to Antigoneia (Alexandria Troas), *remained there*, although the

* Waddington, *Mélanges*, i., pp. 24-27.

† M. Waddington (*Mélanges*, i. 26) suggests that the head (Pl. viii. 16) may be that of Paris, whose tomb was shown near Cebren.

‡ Strabo, xiii., p. 527.

Scepsians, who had been transferred to Antigoneia at the same time, were permitted by Lysimachus to return home.

It may be conjectured, therefore, that at some time between B.C. 310 and 280 (?) Cebren was re-peopled from some other town, under the auspices of Seleucus I. or of his son Antiochus I. The new-comers issued bronze coins exactly resembling the old coinage of Cebren, but inscribed "Antioch," the altered name of the town.

Colone, a maritime town of the Troad, is placed by Mr. Calvert

(*Archaeological Journal*, xvii. (1860), pp. 287-291)

COLONE.

on a hill of the range called *Beahik tepch*, where

he discovered Hellenic remains. This site is about three miles north of Eski-Stambul (Alexandria Troas). Mr. Thacher Clarke, however, does not accept this identification, and argues that Colone must have been south of Alexandria Troas, between that town and Larissa.* Kiepert (*Form. orb. ant.*, map ix.) marks the town, with a query, south of Alexandria Troas and below Larissa and Neandria.

Colone was captured by Mania, the widow of Zenis (B.C. 403-400) surrendered to Derkyllidas A.C. 399, and was incorporated with Antigoneia (Alexandria Troas) about B.C. 310.

Its coins (Pl. ix. 1-2) are in bronze only, of the fourth century B.C. The obverse type is a head of Athena; the reverse, a star,† probably represents the sun and alludes to the cultus of Apollo Killseos, which (according to Daë's of Colone, cited by Strabo, p. 612) was originally introduced into Colone by the Aeolians.

L. Müller (*Num. d'Alex.*, p. 237, nos. 925-927) attributes to Colone Alexandrine tetradrachms with the symbol of a star, or a star and a wreath. But this attribution is certainly incorrect, as the coins belong to Müller's Class VI., and were consequently

* *American Journal of Archaeology*, II., p. 141, and map, p. 140.

† Cf. the star as a type at Thyndra (Pl. xvi. 13), and also at Gambrium, where some of the *Æ* coins attributed in Brit. Mus. Cat. *Mysia*, p. 62, to the third century B.C., may belong to the fourth century B.C.

struck after a.c. 200, and long subsequent to the period when Colone had an independent existence.

Hamaxitus, on the western coast of Troas, was tributary to Athens in a.c. 425, and, like Colone, was captured
HAMAXITUS. first by Mania and then by Derkyllidas.* Its inhabitants were removed to Antigoneia (Alexandria Troas) *circ.* b.c. 310. No silver coins of the place are known. The earliest bronze coins (Head of Apollo, *rev.* Lyre) are of good style, *circ.* b.c. 400-350 (Pl. xi. i.). On bronze coins later in date but issued, necessarily, before *circ.* b.c. 310 (Pl. xi. 2) is a representation of Apollo Smintheus, whose temple lay within the territory of Hamaxitus. This type is often repeated on the coins of Alexandria Troas.

Larissa, a maritime town of the Troad, after being tributary to Athens in a.c. 425, shared the lot of Colone and
LARISSA. Hamaxitus in being captured by Mania and by Derkyllidas and in having its inhabitants removed to Antigoneia (Alexandria Troas) *circ.* b.c. 310. It seems probable that, like its neighbours Colone, Hamaxitus and Neandria, it issued coins during the fourth century, but among extant specimens bearing the name of Larissa there are none that can be attributed with certainty to the Larissa in the Troad. Calvert (*Archaeological Journal*, xviii. (1861), 253-255) finds the site of Larissa on the low hill *Liman Tepeli* (Harbour Mound), on the shore about six miles south of Colone [placed by him *north* of Alexandria Troas], and twenty-one miles from Ilium Novum. Some foundations of buildings and fragments of pottery have been found there, but the town appears to have been of small extent.†

* Judeich, *Kleinasiens. Stud.*, p. 39; p. 45.

† Clarke, in his map in *American Journal of Archaeology*, ii., p. 140, places Larissa *south* of Alexandria Troas and Colone, and north of Hamaxitus.

Neandria lay south-east of Alexandria Troas, and was situated on Mount Chigri, where coins of the ancient city have been discovered, as well as extensive walls and other remains that are partly as old as the seventh and sixth centuries B.C.* In the latter part of the fifth century B.C. Neandria was one of the towns paying tribute to Athens, and afterwards came under the sway of Mania (circ. B.C. 400). Its first coins are silver and bronze of good style, belonging to circ. B.C. 400 or a little earlier. Apollo is represented on them, as commonly on coins of the Troad. The inhabitants of Neandria were moved to Antigoneia (Alexandria Troas) circ. B.C. 310, when the coinage must have ceased. Its latest types are copied on the earliest coins of Alexandria Troas. (Cp. Pl. xiv. 5 with Pl. iii. 7.)

Kiepert (*Formae*, map ix., p. 2 and 3) places Scepsis on the upper waters of the Aesepus. Calvert† and Clarke‡ suppose it to have been situated at *Kourshounli-tepah*, north-east of Cebren, on the Scamander. Its silver coinage begins in the fifth century B.C. (circ. B.C. 460). Some of the silver coins and the bulk of the bronze belong to the period 400-310 B.C. About B.C. 400 Scepsis was in the hands of Mania, and in 310 its inhabitants were removed by Antigonus to Antigoneia (Alexandria Troas), though they were afterwards suffered by Lysimachus to return home. After their return the Scepsians seem to have fallen under the influence of the Kings of Pergamum (Strabo, xiii., p. 609), and to have struck few coins of their own excepting some bronze pieces of

* R. Koldewey, *Neandria*, 51st Winkelmannsfest Programm. Berlin, 1891, p. 6; J. Thacher Clarke, "A Proto-Ionic Capital from the site of Neandria," in *American Journ. of Arch.*, ii., p. 1 ff. The identification of Mount Chigri with Neandria was suggested by Mr. Calvert: cp. Ramsay, *Journ. Hell. Stud.*, i., p. 82 f.

† *Archaeological Journal*, xiii. (1865), p. 53.

‡ *American Journal of Archaeology*, iv., p. 317: cp. Ramsay, *Hist. of Anc. Geog.*, p. 155.

late style (second or first cent. B.C.). The Imperial coinage extends from Augustus to Maximinus, and is usually without the name of a local magistrate. A coin issued under Severus Alexander (Imhoof-Blumer, *Griech. Münzen*, p. 629, no. 235; pl. viii. 9) has the name of a strategos.

The letters **NE** and **N** which occur on some of the autonomous silver (p. 80, nos. 2, 3, 4; Pl. xv. 2, 3, 4) are supposed by Dr. Imhoof-Blumer (*Z. f. N.*, i., 140 n.) to indicate *νέα* Scepsis, as distinguished from the original home of the Scepsians, which is called by Strabo (xiii. 607) Palaescepsis. Mr. Head objects to this explanation that we have no independent evidence that the town was ever formally called "New Scepsis," and he suggests that the letters in question may record an alliance with Neandria, though at the same time it is to be noted that only the types of Scepsis itself (Half Horse, *rev.* Fir-tree) are represented, and not, as would be rather expected, those of Scepsis and Neandria in combination.

The two principal types at Scepsis are the fore-part of a winged horse and a Fir-tree (Pl. xv. 4, &c.). The horse is
Types. apparently Pegasus (see p. 80, note to no. 3). The horn in which, on the later coins, the horse's body ends (Pl. xv. 7, &c.) is left unexplained by Dr. Imhoof-Blumer (*Monn. gr.*, p. 267 note), who, however, mentions the view of Dr. J. P. Six, that the type is a *rhyton* in the form of a hippocamp [Pegasus?]. Terra-cotta rhytons partly formed of a horse or a winged horse may be seen in the British Museum.*

The tree, usually called by numismatists a palm, is no doubt correctly described by Imhoof-Blumer (*Monn. gr.*, p. 267) as one of the *coniferae*—the fir or the pine. It is perhaps a tree from the forest of Mount Ida† (Cp. "Scamandria," p. 79 *infra*); but its

* Cp. Smith, *Dict. of Antiquities*, s.v. "Rhyton."

† Cp. Imhoof-Blumer, *Monn. gr.*, p. 267, notes 51 and 52; Schliemann, *Ilios*, p. 57.

mythological significance is uncertain, unless indeed it is connected with the Dionysos who appears on some of the later coins of Scepsis.

The types of the Imperial coins chiefly relate to Dionysos, who sometimes appears as horned and bearded (Pl. xv. 14, 15, cp. 13; xvi. 2).^{*} On a coin of Severus Alexander (Imhoof-Blumer, *Griech. Münzen*, p. 629, no. 235; pl. viii. 9) this Dionysos is seated on a throne, on each side of which is an ox standing.

The type of Aeneas leaving Troy with Anchises and Ascanius (Pl. xvi. 4) occurs also at Ilium and Dardanus (p. 51, note to no. 29), and may have seemed specially appropriate, because Palaescepsis—the original home of the Scepsians—was believed to have been founded by the family of Aeneas. The Imperial coins of Scepsis are usually inscribed ΚΗΨΙΩΝ ΔΑΡΔΑΝΙΩΝ (ΔΑΡΔΑ &c.).

ILIUM GROUP.

In discussing the coinage of Ilium, attention must here be mainly confined to questions of dates and types, without entering into the claims of the city (Iliarlik) to be the Ilium whose fortunes are set forth in poetic guise in the *Iliad*.† The bulk of the coinage is bronze of the Imperial Age, and none of the autonomous pieces can well be assigned, from the criteria of style and fabric, to a date earlier

* See also Imhoof-Blumer, *Griech. Münzen*, p. 628, no. 230.

† See e.g. on this question, *Journal Hell. Stud.*, ii., p. 7 ff. (Jebb); iii., p. 69 ff. (Mahaffy); iii., p. 185 ff. (Jebb); iv., p. 142 ff. (Sayce and Jebb). On the history and remains of Ilium, see Schliemann, *Ilios*, chapters iii. and xi., and the convenient historical summary given by Prof. Jebb in *Journ. Hell. Stud.*, ii., p. 20 ff. See also Schuchhardt, "Schliemann's Excavations," Eng. trans. by Miss E. Sellers, London, 1891; Perrot and Chipiez, *Hist. de l'Art*, tom. vi (cp. Ramsay in *Classical Review*, 1893, p. 478); Doerpfeld in *Mittheilungen d. deutsch. arch. Inst. in Athen*, xviii. (1893), p. 199 ff., on discoveries of remains of the Mycenaean Age.

than *circ.* B.C. 800. This is what, on historical grounds, would be expected; for until the days of Alexander the Great Ilium was a place of no political importance.* On landing in the Troad in B.C. 334, the Macedonian conqueror approached Ilium, and there, after a solemn sacrifice to Athena Ilias, commanded that the town should be enlarged and have the rank of a city.† Lysimachus still further increased its importance by incorporating with it some decayed towns in the neighbourhood, and surrounding it with a wall of five miles circumference, within which he built a temple of Athena. According to a statement of Demetrius of Scopsis—the exactness of which has been sometimes doubted—the place was already in decay about the year B.C. 190.‡ This statement appears to receive some confirmation from the numismatic evidence, for none of the extant specimens in the earliest series of Ilian coins (nos. 1-9; Pl. xi. 3-7) can well be later than *circ.* B.C. 250. From this period till *circ.* B.C. 189 there is a break in the coinage.‡ After the Peace with Antiochus in 189, the Romans confirmed the liberties of Ilium, and annexed to it Rhoe-tum and Gergis, thus (says Grote §) making the Ilians masters of the whole coast from the Peraea (or continental possessions)

* "The mass of coins picked up from the surface by the shepherds on the site of *Novum Ilium* is really astounding, but they are all of bronze; the oldest of them do not go farther back than the Macedonian period. For the most part they are coins of Ilium itself, but those of Alexandria Troas are also very frequent; while those of Sigam, Dardanus, Tenedos, Ophrynum, Gergis, Elaoussa, Abydus, Lampacus, Heracleum, Smyrna, Ephesus, Adramyttium, Assos, &c., are rarer. I found also coins of all these places in my excavations on Hissarlik, and a very large number of Ilian coins, or coins of Alexandria Troas. Silver tetradrachms of Ilium are very rare; I never found one." Schliemann, *Ilios*, p. 612.

† See *Journ. Hell. Stud.*, iii., p. 78 (Mahaffy); iv., p. 216 (Jobb); Schliemann, *Ilios*, p. 173.

‡ According, however, to Prof. Percy Gardner (*Brit. Mus. Cat. Seleucid Kings*, p. 25, no. 10; p. xxxi.), the tetradrachms of Antiochus III. (B.C. 222-187) which bear the symbol of Athena Ilias were struck at the mint of Ilium.

§ *Hist. of Greece*, i., p. 273, chap. xv.

of Tenedos (southward of Sigeum) to the boundaries of Dardanus, which had its own title to legendary reverence as the special sovereignty of Aeneas. It was at this time that the Ilians began—like many other cities of Asia Minor—to issue flat tetradrachms (Pl. xi. 8-11) and drachms (Waddington, *Voy. en As. Min.*, p. 79, no. 1) of Attic weight, bearing the names of magistrates.

Fimbria took Ilium by siege in a.c. 85, but Sulla repaired the havoc that he had created. The later history of Ilium—as Prof. Jebb has well remarked—is little more than that of the Roman benefits conferred upon it, and “the Roman *originum memoria* is henceforth the dominant note.” Julius—as the descendant of Aeneas and Iulus—and Augustus added fresh territory to the city, and confirmed its privileges. Caracalla visited it, and paid honours to the tomb of Achilles.

The types of the autonomous coins relate to Athena Ilias (Pl. xi.). This goddess also figures prominently on the Imperial money, the other types on which refer to Hektor and the heroes of the Trojan War. The majority of these types have been described and engraved by Postolaccus in Schliemann's *Ilios*, pp. 641-647, but attention may here be directed to the following:—DARDANUS AND CHEYSE? (Pl. xiii. 2); PRIAM (Pl. xiii. 3); GANYMEDE (Pl. xii. 4, 8; *Zeit. f. Num.*, xvii. p. 9; pl. i. 15); the JUDGMENT OF PARIS (*Zeit. f. Num.*, xv. 43; pl. iii. 12); APOLLO EKATOS (*Zeit. f. Num.*, xvii. p. 9; pl. i. 14); the river-god SKAMANDER* (Pl. xii. 9; Pl. xiii. 10). The favourite hero is HECTOR, who in historical Ilium had a temple and statue, and who was believed by the Ilians to haunt their city and the plain of Troy.† On the coins he is seen in a quadriga of galloping horses (Pl. xii. 14); rushing forward to fire the Grecian ships

* On the Skamander, see Schliemann's *Ilios*, p. 93.

† Max. Tyr., *Dias. xv.*, cited by Head in *Num. Chron.* 1868, p. 327.

(Pl. xiii. 9)—“vel Danaum Phrygios jaculatus puppibus ignes;”^{*} or trampling on the prostrate body of Patroklos (Pl. xiii. 4).†

Pl. xii. 2 represents the FLIGHT OF ÆNEAS from Troy, an incident not related in Homer, but one which is often portrayed on archaic Greek monuments; for instance, on the black-figured vase in Baumeister, *Denkmäler*, i., p. 31, no. 32, and on a sixth-century coin of Aenes in Macedonia (Von Sallet, *Beschreibung*, ii., p. 33; pl. iii. 21). On the coins (Pl. xii. 2; sp. 5) Æneas carries Anchises‡ and leads Ascanius, but Creusa is absent. The representation, therefore, exactly corresponds with the Virgilian description of the Flight.§ A similar type occurs on the coins of Dardanus (Pl. x. 2), and of Scopsis (Pl. xvi. 4).

The statue of the Athena of Ilium—sent from heaven by Zeus in answer to the prayer of Ilos, the founder of the city—is described by Apollodorus (iii. 12, 3) as holding an uplifted spear in the right hand, and in the left a distaff and spindle. The statue was three cubits long, and the feet were joined. The coins on Pl. xi. 3, 4-7, 8, 10, 11; Pl. xii. 12; Pl. xiii. 5, 6, are evidently intended to recall this famous statue. Probably the mummiform figure|| on the Imperial coin Pl. xii. 12** gives a better idea of the archaic statue of Athens at Ilium than is given by the earlier coins of the city, in the case of which the engraver appears to have shrunk from representing Athena in a barbarous form. The type of no. 53 (Pl. xii. 10; Pl. xiii. 5) has not been quite satisfactorily explained. Probably it represents Ilos sacrificing a bull to the

* Virg., *Æn.*, ii. 276.

patron goddess of his city. On Pl. xii. 11 the bull is seen approaching the statue of the goddess—a willing victim for the sacrifice.*

The site of Gergis, according to Calvert (*Archæological Journal*, xxi., 1864, pp. 51-53) and Schliemann

GERGIS.

(*Ilios*, pp. 19, 55), is to be found where Greek

remains are seen on the rocky heights of Bali-Dagh, near Bounar-bashi. Mr. Calvert says that coins of Gergis are sold in the neighbourhood of Bali-Dagh, and that specimens have been picked up there. Kiepert (*Formæ*, map ix., p. 2 and note 22 on p. 3) places Gergis farther east, on the Granicus.

Gergis is first mentioned by Herodotus (v. 122), who states that the inhabitants were a remnant of the ancient Teucrians. About B.C. 400 it was under Persian rule, and Xenophon (*Hæll*, iii. 1, 15) refers to Gergis and Scepsis as two fortified towns where Mania had chiefly deposited her treasures. In B.C. 339 Gergis was taken by Derkyllidas. Attalus I., king of Pergamum (B.C. 241-197), removed the inhabitants of the town to a place near the sources of the Caicus,† and their old territory was given by the Romans, *circ.* B.C. 189, to Ilium.‡

The coinage of Old Gergis—the new town does not appear to have coined money—is not earlier than *circ.* B.C. 400, and necessarily comes to an end in the reign of Attalus, B.C. 241-197. The latest coins do not appear to be posterior to *circ.* B.C. 241, if, indeed, they are as late. Nos. 5-8 (p. 55) show in the exergue an ear of corn, a symbol found also on coins of Alexandria Troas (*circ.* B.C. 300 and later), Assus (B.C. 400-241), and Neandria (B.C. 400-310).

* With this type compare coin of Cyzicus, Wroth, *Cat. Mysia*, pl. xi. 1 (exergue). The sacrifice of Xerxes to Athena Ilios consisted of a thousand oxen (Hdt., vii. 43).

† Strabo, xiii., p. 615.

‡ Liv., xxxviii. 39.

The female head on the obverse of the coins (Pl. x. 12, 13, 14, 15) can be identified as that of the Sibyl Herophile, from the statement of Phlegon preserved in Steph. Byz., s.v. Γέργις:—Γεργιθία ἡ χρησμολόγος Σιβύλλα, ἣ τιν καὶ ἐτετύπωτο ἐν τῷ νομίσματι τῶν Γεργιθίων, αὐτῇ τε καὶ ἡ σφίγξ, ὡς Φλέγων ἐν Ὀλυμπιάδων πρώτῃ. The birthplace of the Sibyl—claimed also by Erythrae*—was by some writers placed in the neighbourhood of Gergis, at Marpessus, while her tomb was stated to be in the temple of the Apollo of Gergis.†

A head of SIBVLLA placed within a wreath of laurel occurs on denarii of L. Manlius Torquatus, *circa*. B.C. 54,‡ and probably also on the obverse of denarii of T. Carisius, A.C. 48, which have a sphinx as the reverse type.§

Ophrynum was situated between Dardannus and Rhoeteum.

Mr. Calvert,|| who places the site at half a mile

OPHRYNIUM.

N.N.E. of the village of Renkioi, remarks that the acropolis occupied the brow of one of the highest hills in the neighbourhood. The remains are extensive, spreading from the acropolis to the west and north-west down a steep descent towards the Hellespont. There are traces of a mole that served to form the port.

Little is known of the history of Ophrynum. It is mentioned (Herodotus, vii. 43) in the time of Xerxes, and was visited by

|| *Archæological Journal*, 1860, xvii., p. 291 f.; see also Newton, *Travels in the Levant*, i., p. 132 f.; Schliemann, *Ilios*, p. 59 &c. — Calvert found 14 bronze coins of Ophrynum on the site.

Xenophon (*Anab.*, vii. 8, 5). Its coins belong to the fourth century B.C., and are probably not anterior to Philip of Macedon, from whose money the reverse type of no. 1 (Pl. xiv. 6) appears to be copied. Roman remains and Roman Imperial Coins have been discovered on the site of Ophrynum, but as its autonomous coinage does not extend beyond *circa* B.C. 300, the town probably ceased to be of importance at about that period. The warrior represented on the coins, Pl. xiv. 6 *obv.*; xiv. 7, 9, 10 *rev.*, is probably intended for Hector, as there was a grove dedicated to this hero at Ophrynum.* On the reverse of nos. 2-7 (Pl. xiv. 8) the infant Dionysos is seen playing with a bunch of grapes. In all probability the vineyards of Ophrynum produced excellent wine, like those of the modern Renkioi.

Rhoeteum stood near the entrance of the Hellespont, south of Ophrynum and north of Ilium. In B.C. 425 it was a tributary of Athens, and in the fourth century it issued coins. About B.C. 189 it was handed over by the Romans, together with Gergis, to Ilium (Livy, xxxviii. 39). The city was still existing in the time of Strabo (xiii. 595) and of Pliny (*H. N.*, v. cap. xxx.).

The coinage of Rhoeteum is represented by a unique silver coin in the Waddington Collection.

Obv. Head of Apollo l., laur.

M. Waddington (*op. cit.*, p. 80) suggests that the crescents represent the three phases of the moon, and that the type thus

* Strabo, xiii., p. 595.

refers to the worship of Artemis. A similar type occurs at Biryttia in the Troad (see *infra*) and at Thebe in Mysia (B. M. Cat. *Mysia*, p. 179).

Scamandria, a small town on the river Scamander. Its site was supposed by Mr. Calvert* to be at Ine (Ezkinge), a **SCAMANDRIA.** Turkish town where many fragments of sculpture and pottery are to be seen; but Kiepert (*Formae*, p. 2; p. 3; map ix.) marks it at Kourshounli Tepeli, where Calvert and Clarke place Scepstis. The coins—which are all of bronze and of the fourth century B.C.—have been well separated by Dr. Imhoof-Blumer† from the currency of Scepstis: the Scepstian coins—with the exception of the earliest silver—have H and not A in the inscription (ΣKH etc., not ΣKA). The types of Scamandria consist of a bunch of grapes, a fir-tree,‡ (Pl. xiv. 12), and the head, sometimes inscribed ΙΔΗ, of the nymph of Ida, the mountain where the river Scamander took its rise (Pl. xiv. 12, 13, 14).

The place probably ceased to be of importance after the close of the fourth century B.C.,§ but the inhabitants did not share the lot of their neighbours in being transferred to Antigoneia (Alexandria-Troas). A fragmentary inscription published in *C. I. G.*, no. 3597, records an agreement between the people of Ilium and Scamandria apparently in regard to certain religious rites. Scamandria is mentioned by Pliny (v. cap. xxx.) as being in his time a “*civitas parva*,”|| and it occurs in the list of Hierocles (cp. Starratt, “Inscriptions of Assos,” in *Papers of American School of Class. Stud. at Athens*, vol. i., p. 64:—“*Ανθιμος ὁ πρόεδρος Σκαμάνδρου*).

* Referred to in Schliemann's *Ilios*, p. 57.

‡ On this type, see under “Scepstis.”

§ Ramsay, *Hist. Geog.*, p. 154.

|| He refers in the same sentence to New Ilium.

Sigeum, situated at the entrance of the Hellespont, north-west of Ilium.* The earliest coins that can be with certainty attributed to Sigeum are not earlier than the fourth century B.C., at which period the Athenian colonists, who both before and after the time of Pisistratus had disputed possession of the place with colonists from Mytilene, were evidently finally established. The coin-types relate to Athena (Pl. xvi. 5-11),† who had a temple at Sigeum as early as the time of Alcaeus (τὸ Ἀθηναίων τὸ ἐν Συγείῳ, Hdt., v. 95). The fine head of the goddess, Pl. xvi. 5-9, recalls the helmeted head of Athena on coins of Syracuse by the engraver Eukleidas.‡

None of the coins appear to be later than *circa* B.C. 300. When Lysimachus in B.C. 302 invaded Asia Minor, he besieged Sigeum§ and introduced a guard there. If L. Müller is right in attributing to Sigeum Lysimachian tetradrachms bearing a crescent and various monograms, it is at this period that they must have been struck (L. Müller, *Lysim.*, nos. 391-402). The Alexandrine coins assigned by Müller (*Num. d'Alex.*, nos. 918-922) to Sigeum are of Class V. *i.e.* B.C. 250-200.

In Strabo's time Sigeum no longer existed (xiii. p. 595). The city

* In Kiepert's *Spezialkarte* (map iv.) the ruins are marked a little south of the village of Yenishehir. Cp. Schliemann, *Ilios*, p. 72.

† The head of Zeus also occurs: Leake, *Num. Hell.*, p. 115; Mion., ii., p. 671, no. 263.—The bronze coin with type a cock, assigned to Sigeum in Head's *Historia num.*, p. 475, was described from a specimen in the British Museum, of which the badly-preserved legend was read ΣΙΓΕ. The true reading is ΤΕΓΕ and the coin belongs to Tegea in Arcadia.

‡ Head's *Syracuse*, pl. iv. 10; pl. v. 6; Arthur J. Evans in *Num. Chron.*, 1891, p. 349. Cp. also the helmeted head of Athena Parthenos on a gold medallion in the Hermitage, Harrison, *Mythol. and Mon. of Anc. Athens*, p. 454, fig. 52.—I cannot agree with M. Babelon (*Rois de Syrie*, p. li.) that the head on the coins of Sigeum is necessarily that of the Athena of Ilium. M. Babelon bases his identification on *C. I. G.*, no. 3595 (the inscription now at Trinity College, Cambridge). This inscription, though found at Sigeum, is (as Dobree and Boeckh *ad loc.* have shown) evidently a decree of Ilium, not of Sigeum itself.

§ *Diod. Sic.*, xx. 107.

had been destroyed by the people of Ilium, and its territory appears, at least as early as B.C. 189, to have become the property of the Ilians.*

Thymbra lay to the south-east of Ilium, and has been identified with *Akachi Kioi*, the present Thymbra Farm,

THYMBRA.

about an hour's walk from Hissarlik.† The necropolis of the town extended to the artificial mound Hanai Tepeli, about 500 yards distant. This mound, when excavated by Calvert and Schliemann, yielded pre-historic remains as well as archaic and later Greek pottery.

The only coins known of Thymbra are of the fourth century A.C. (probably of the latter half).‡ The fate of the town is unknown: possibly it was one of the decayed towns that were incorporated by Lysimachus with Ilium (Strabo, xiii. 593). The existence of a cultus of Zeus Ammon is to be inferred from the obverse type of the coins (Pl. xvi. 12).§ The reverse type, a star,|| is probably symbolical of Apollo Thymbraeus, whose temple at Thymbra is mentioned in the writers (Strabo, xiii. 598; Steph. Byz., s. c. *Θύμβρα*; cf. Virg., *Aen.*, iii. 85).

ASSUS GROUP.

The importance of Assus, the ancient and flourishing stronghold of Southern Troas, may be judged from its extensive remains at the modern village of *Behrium*

ASSUS.

explored by Mr. J. Thacher Clarke and his fellow-workers.**

† See Schliemann's *Ilios*, especially Appendix iv., by F. Calvert; and Calvert in *Archaeological Journal*, xvi. (1859), p. 1 f.; see also Ramsay in *Journ. Hell. Stud.*, ii., pp. 79, 80.

‡ Head, *Hist. num.*, p. 475, "B.C. 350-300."

§ This type occurs at Pitane in Mysia.

|| Cp. this type at Gambrium (Mysia) and Colons (Troas).

** See Mr. Clarke's excellent *Report on the Investigations at Assus*, 1881. Boston, 1882. The inscriptions of Assus are published by Mr. J. R. S. Sterrett in *Papers of the American School of Class. Stud. at Athens*, vol. i. (1885), pp. 1-90.

In antiquity the neighbourhood of Assus was noted for its wheat (cp. the "ear of corn" symbol on the coins), and the city had a monopoly in the export of the produce of the Southern Troad. At the present day, coasting-vessels lie within the ancient mole ready to ship to Smyrna and Mytilene the valonia brought by camel-trains from all parts of the interior.*

None of the coins of Assus need necessarily be assigned to an earlier period than the fifth century B.C., and it is probable that the city first began to issue money (Pl. vii. 9) when freed from the Persian yoke through the Battle of Mycale (B.C. 479) and the fall of Byzantium (B.C. 477). The coinage thus initiated extends to about B.C. 241, when Assus was incorporated in the Kingdom of Pergamum. The tyranny of Eubulus (circ. A.C. 360) and that of Hermeias (ob. B.C. 345), the friend of Aristotle, seem to have had no special influence on the coinage. The silver Alexandrine coins assigned to Assus by Müller (*Num. d'Alex.*, nos. 928-931) belong—if his attribution is correct—to the period after B.C. 133. The Imperial coinage (imperfectly represented in the British Museum) extends from Augustus to Severus Alexander. The coins of Commodus and later Emperors bear the names of the local *στρατηγοί*.

The two principal types are a Griffin and a head of Athena (Pl. vii. 9-16). The Griffin appears on the earliest coins and is again found on the Imperial money. It presumably refers to the worship of Apollo. The effigy of Athena is not seen till about B.C. 420, when it occurs on the interesting specimen described *infra*, p. 36, from an electrotype. On the obverse of this coin is a fine head of the goddess, wearing a helmet ornamented with a griffin, and on the reverse an archaic simulacrum probably of Athena herself. The head of Athena is placed on a bronze coin of Augustus (*infra*, p. 38, no. 24); and the people of Assus, in a decree passed on the accession

* Clarke, *op. cit.*, pp. 55, 56.

of Caligula, take an oath of allegiance to the Emperor in the name of Athena—*τὴν πάτριον ἄγνην παρθέρον*.* This goddess was the Athena Polias in whose honour the Assians erected the Doric temple on their acropolis,†

Antandrus, an ancient town (Hdt., vii. 42; Steph. Byz., s.v.)

ANTANDRUS. on the north of the Gulf of Adramyteum, east of Gargara, was famous for the timber which it supplied for ship-building (Virg., *Aen.*, iii. 5; Thuc., iv. 52). It came

under the Persian and Athenian dominations, and is mentioned as a tributary of Athens in B.C. 425. Its coinage begins in the fifth century. Of the specimens in the British Museum the earliest appears to be of *circ.* B.C. 420, and the latest (in the autonomous series) of about the time of the last main issue of the coins of Gargara, probably *circ.* B.C. 284.‡ There is also an Imperial coinage.

* Clarke, *op. cit.*, p. 133 f.; also in Sterrett, *op. cit.*, no. xxvi., p. 50.

† Sterrett, *op. cit.*, p. 53; cp. no. xiv., p. 33:—*τῆς τῆς Πυλ[ί]δος Ἀθηνᾶς ἱεραῖου καὶ πατρῴου.*

‡ The silver stater at Paris, of which the reverse is photographed in Imhoff-Blumer and Keller, *Tier- und Pflanzen Bilder*, pl. ix. 17 (=Brandis, p. 439, no. 1=Mion., iii., p. 665, no. 659), and attributed to Antandrus, is evidently of an earlier date than B.C. 420 (450?).—H. P. Borrell attributes the three following coins to Antandrus:—

- i. *Obv.* Forepart of lion r. *Rev.* Lion's head r. *AR* '2.' Wt. 29½ grains. (*Num. Chron.*, vi. 146.)
- ii. *Obv.* Head of Apollo r. *Rev.* **ANTA** Forepart of bull r. *E* '3.' (*Num. Chron.*, vi. 147, no. 3; cp. *N. C.*, iii., p. 96.)
- iii. *Obv.* Head [bearded Herakles?] l. *Rev.* **AN** Club. *E* '4. British Museum, from the Borrell Collection (cp. *Rev. num.*, N. S. xiv., p. 181; *Num. Chron.*, iii. 96).

Nos. i. and ii. are stated by Borrell to have been sold by him to the Bank of England, but I cannot find that they came with the Bank Collection to the British Museum. No. i. was purchased by Borrell (MS. Catal. in Brit. Mus.) in the neighbourhood of Antandrus. The inscription **AN** on no. iii. favours—though not decisively—the attribution to Antandrus, but the types and fabric are not specially suited to this town, and I have not ventured, therefore, to catalogue the coin under Antandrus.

The principal types of the autonomous coinage are a head of Apollo, a lion's head, a female head (Artemis Astyrene? Pl. vii. 1, 2), and a goat, sometimes standing before a fir-tree—a type that has not been satisfactorily explained. On the Imperial coins Asklepios, Apollo, and Hephaistos (Pl. vii. 8) are found. The archaic cultus-statue of Artemis Astyrene occurs on a coin inscribed **ACTVPHNH**, published in *Zeit. für Num.*, vii., p. 24; pl. i. 14. The temple of this goddess was situated in a grove at Astyra,* a small place between Antandrus and Adramyteum, and was under the administration of the people of Antandrus.†

The extensive ruins discovered by Mr. Diller on the summit of *Qozlou-Dagh*, a spur of the main range of **GARGARA** Ida, lying north-east of the acropolis of Assus, have been identified by Mr. Thacher Clarke‡ as those of Gargara. According to Mr. Clarke, the entire enclosure within the walls is nearly as large as that of the neighbouring Assus, while the acropolis is much larger. In the time of Strabo, the town of Gargara was situated on the sea-shore, the inhabitants having removed thither from the summit of *Qozlou-Dagh*, probably in the time of the Pergamene kings.§ The district at the present day is fertile, and its fertility was celebrated in antiquity.||

From B.C. 454 to 440 the annual contribution of Gargara to the Athenian tribute-lists was 4,500 drachms, while Assus contributed one talent. Possibly the city issued coins during this period, though the earliest specimens now extant are silver pieces of

* Astyra did not issue coins: see Borrell in *Num. Chron.*, vi., p. 148.

† Strabo, xiii., 606 und 613; Xen., *Hell.*, iv., 1, § 41.

‡ In his paper in the *American Journal of Archaeology*, iv., p. 291 ff. Kiepert (*Spezialkarte vom westlichen Kleinasien*, map iv.) places Gargara on the shore farther to the east of Assus, below Arykly: cp. his *Formae*, map ix., p. 3.

§ Clarke, *op. cit.*, p. 313.

|| Cp. Virg., *Georg.*, i. 103; Ovid, *Art. Amat.*, i. 57; Senec., *Phoen.*, iv. 608.

good style (Pl. x. 3, 4), which can hardly have been minted before *circ.* *s.c.* 420. The silver coinage and the bulk of the bronze, judging from style, come to an end at least as early as the establishment of the Pergamene Kingdom, *circ.* *s.c.* 284. From that time till about *s.c.* 133 (?) the city appears to have no coinage of its own. Its later currency consists of bronze of the second and first centuries *s.c.* (Waddington, *Asie-minceure*, p. 72, pl. viii. 5), and of rare Imperial coins extending from Augustus* to Sept. Severus.† In Byzantine times Gargara was a bishopric and a place of some importance. It was captured by the Turks in the fourteenth century.

The prevailing types on the autonomous coins are Apolline, as usual in Troas. The horse (*e.g.* Pl. x. 4, 6) may possibly be a Thessalian type, for the legendary founder of Gargara was Gargaros, the son of Zeus by the Thessalian nymph Larissa.‡ Asklepios occurs on the Imperial coins.

Lamponia was in the neighbourhood of Assus and Gargara.

LAMPONIA. Mr. Thacher Clarke (*American Journ. Arch.*, iv.

(1888), p. 315) proposes to identify it with the ancient site discovered upon the summit of *Qojekia-dagh*, an eminence midway between Gargara and Antandrus, and 6½ kilo-mètres from the sea. Lamponia is mentioned by Herodotus (v. 26) as being captured in *s.c.* 506 by the Persian commander Otanes. In the Athenian tribute-lists, *s.c.* 454-426, the Lamponians appear with an annual contribution, first of 1000, and afterwards of 1400, drachms. The coinage begins *circ.* *s.c.* 420, and does not extend beyond *circ.* *s.c.* 350, at which period, or somewhat later, the existence of Lamponia would seem to have ceased (Clarke, *op. cit.*,

* Boutkowski, *Diet.*, p. 1792.

† *Mion.*, Sup. τ., p. 358, no. 495, with the name of a *στρατηγός*.

‡ Clarke, *op. cit.*, p. 307.

pp. 316, 317). Mr. Clarke supposes (p. 317) that the town was deserted during the general migration of the Trojan population that took place under Alexander and his immediate successors. The obverse of the coins is a bearded head of Dionysos (Pl. xiii. 11, 12, 13). The reverse type, a bull's head, appears also on the money of Assus.

"The site of Pionia is a low hill upon the northern bank of the Satnioeis [modern river *Touza*], bearing somewhat west of north from the Qojekia-dagh (Lamponia)."^{*} The fields in this region are exceptionally fertile, and Clarke supposes that Pionia was once the centre of an agricultural district of importance. Strabo (p. 610) states that it was a settlement of the Leleges, but it is not heard of in pre-Roman times. In the Roman period it belonged to the *conventus juridicus* of Adramyteum, and was still existing in Byzantine times. Its coins are bronze, ranging from the time of Hadrian to that of Caracalla. On some of them the name of the local magistrate, a *στρατηγός*, occurs. The supposed alliance of Pionia with Assus is based on a mistaken reading of a coin of Pionia (see Borrell in *Num. Chron.*, vi., p. 188). By some numismatists Pionia is described under "Mysia," but its geographical, if not its political, position suggests that it should be classed with the Troad towns.

Pionia was believed to have been founded by Pionis, one of the Herakleidae, and Herakles is one of the divinities represented on its coins (Pl. xiv. 11). Pausanias (ix. 18, 3) declares from his personal observation that when sacrifice was offered by the Pionians to the hero Pionis, smoke rose spontaneously from his grave.

^{*} Clarke, in *Am. Journ. Arch.*, iv. (1888), pp. 317-319.

ABYDUS.

Abydus on the Hellespont. Mr. Head and others attribute to

ABYDUS. Abydus an electrum coinage during the sixth century, bearing the type of an eagle, the usual

device on the inscribed coins of the city.*

The earliest known silver money is of the Persic standard, and probably belongs to the period B.C. 480-450 (Pl. i. 1-6). In B.C. 411 Abydus revolted from Athens, and from that time till about B.C. 388 was a faithful ally of Sparta. During this period Abydus was the military station of the Spartans on the Hellespont, and about B.C. 394 it was put into a good state of defence by its Harmost Derkyllidas, who resisted the attempts of Pharnabazus to obtain possession of the town. It is to this period—*circ.* B.C. 411 to *circ.* B.C. 387—that the finest coins of the city must be assigned. The head of Apollo, Pl. i. 8, is of much beauty, and the well-known subject of Nike sacrificing an animal—usually a bull, but in this case a ram—is most gracefully rendered on the gold stater, Pl. i. 7.† Another pleasing gold stater of Abydus, of the same period (published by Loebbecke in *Zeit. für Num.*, xvii. p. 169, no. 2; pl. "x." (=vi.), 2), has the type of Artemis riding on a stag. The metal for the gold currency was in all probability derived from the mines in the territory of Abydus. These gold-mines are mentioned

B. M. Cat. *Ionïa*, p. 7, no. 33; pl. i. 23. "Abydus²."

ii. *Obv.* Eagle standing l. with head turned back: in front, dolphin.
Rev. Quadripartite incuse square.

El. Stater of Phœnician standard. Head, *Num. Chron.*, 1875,
p. 265; pl. vii. 7.

† Compare the type of Nike sacrificing a ram on a gold stater of Lampsacus in Dr. Hermann Weber's Collection (Wroth, Cat. *Mysia*, p. xxi., no. 3). On "Nike sacrificing a Bull," see Cecil Smith in *Journ. Hell. Stud.*, vii., p. 275 ff.

by Xenophon *circ.* B.C. 389-8, though in the time of Strabo (xiii. p. 591) they were nearly exhausted.

Abydus, from the Peace of Antalcidas (B.C. 387) till B.C. 341, when it was in league with Athens against Philip II., appears to have maintained an independent position.* In B.C. 335 it was occupied by the Macedonians. From *circ.* B.C. 387 till *circ.* B.C. 320 there seems to be a gap in the coinage. On the long series of silver coins with the Apollo and eagle types (Pl. i. 9-15) more than twenty magistrates' names occur.† This series may, on grounds of style, be attributed to *circ.* B.C. 320 to 280. The latest autonomous coinage consists of the coarse tetradrachms of Attic weight (Pl. ii. 10-13), of which more than twenty-eight varieties are known.‡ These cannot have been struck earlier than B.C. 196, when, on the conclusion of the war with Philip V., Abydus was declared free by the Romans (Liv. xxxiii. 30), and the first issue may not, perhaps, have taken place till *circ.* B.C. 189, when the Romans made peace with Antiochus. At about the latter period the people of Ilium appear to have begun the coinage of Attic tetradrachms, while the tetradrachms of Alexandria Troas were coined—so far as can be ascertained—either from B.C. 176 to 77 or from B.C. 164 to 65. On the Imperial coins—which for the most part relate to Artemis—the most interesting type is the well-known representation of Hero and Leander, Pl. iii. 2 (see also p. 7, no. 60, *note*). This subject also occurs on the coins of Sestus, and on some specimens Eros is seen flying, torch in hand. The evidence of the coins from B.C. 411 onwards shows that Apollo and Artemis were the principal divinities of Abydus. The temple of Artemis is mentioned by Polybius (l. xvi. § xxxi.), who says that when the city was besieged by Philip V. of Macedon the women of Abydus took refuge there.

‡ Imhoof-Blumer, *loc. cit.*

DARDANUS.

Dardanus was situated on the Hellespont, north of Ophrynum and 70 stadia south of Abydos. It lay in the plateau of **DARDANUS.** *Maltepe*, below Cape Kefez-Burnu (Lolling, *Mittheil. des deutschen arch. Inst. in Athen*, 1881, p. 220), where Greek remains have been discovered (Lolling, *loc. cit.*; Schliemann, *Ilios*, p. 134). Various electrum and silver coins bearing a cock, the distinctive type of Dardanus, are supposed to have formed the currency during the seventh and sixth centuries. The attribution of these coins—enumerated in a note below*—is not, however, certain. The earliest coins certainly of the place are of the fifth century. The coin no. 1, Pl. ix. 3, bears a monogram $\overline{\text{H}}$, supposed by De Luynes (*Num. des Satrapies*, p. 48) to indicate the name of Zenis of Dardanus, satrap, under Pharnabazus, of Aeolis,† and this view

† De Luynes, *Num. des Satr.*, p. 48, describes the figure on horseback (Pl. ix. 3) as Mania, the widow of Zenis and successor in his government. But the figure is undoubtedly male, as Mr. Head (*Num. Chron.*, 1873, p. 124) has pointed out.

has been regarded as probable by Brandis (p. 319; p. 428) and by Head (*N. C.*, 1873, p. 124; *Hist. num.*, p. 471). Plausible as is this interpretation of the monogram, there is a decided difficulty in assigning to the time of Zenis (*circa* a.d. 413-399?) a coin which in style appears to be at least as early as B.C. 430.

The bulk of the autonomous coinage of Dardanus belongs to the fourth century (Pl. ix. 4-11). Strabo states (xiii., p. 595) that in the time of the Kings (Alexander's successors) the inhabitants of Dardanus were on more than one occasion removed to Abydus, and then moved back again. After the peace with Antiochus in B.C. 189, the Romans declared Dardanus a free city in honour of the Trojan descent of the inhabitants,* and it is probably to this period that a few bronze coins of late style belong.† Pliny (*H. N.*, v., cap. 30) describes Dardanus as a small town. Its Imperial coinage extends from Augustus to Sept. Severus and his family, the types‡ being principally Trojan, like those of Ilium: see *e.g.* Pl. x. 1, the Rape of Ganymede; Pl. x. 2, the Flight of Aeneas. The historical Dardanus was not, however, on the site of the Homeric city (Strabo, p. 592).

The ordinary types of the autonomous coins are a horseman and (on the *reverse*) a cock. We have no clue to the significance of the last-named type beyond the statement of Pollux (ix. 84), that the people of Dardanus represented "a cock-fight" on their coins.‡ Usually, a single cock is represented, sometimes (Pl. ix. 11) in fighting attitude. Two cocks facing one another are seen on a fifth

* Livy, xxxviii. 39: the same thing took place at Ilium.

† Some bronze coins of Dardanus have on the reverse an eagle, a type apparently suggested by the coins of Abydus: Imhoof-Blumer, *Griech. Münzen*, p. 626, no. 218; pl. viii. 1; *ib.* p. 626, no. 219.

century coin of Dardanus in the Gotha Collection,* on the early electrum coin (if of Dardanus) described above, p. xlii., note * no. ii., and on a Lycian coin (Babelon, *Perses achéménides*, Pl. xii. 10).

ZELEIA, BIRYTIS, GENTINUS.

Zeieia was situated at a distance of 80 stadia from the mouth of the Aesepus and 190 from Cyzicus.† The Turkish village *Sarıkioi* is probably its site (Lolling in *Mittheilungen des ö. arch. Inst. in Athen*, vi. (1881), p. 229). The town is mentioned in the Iliad (ii. 824), and Mr. Head has suggested‡ the possibility of its having struck electrum coins with the type of the Chimaera as early as the seventh or sixth century. Zeieia was the headquarters of the Persian army just before the Battle of the Granicus (B.C. 334), but after that event it became autonomous, and a revolution resulting in the establishment of a democracy appears to have taken place.§

The bronze coins inscribed with the name of Zeieia (Pl. xvi. 13) may be safely assigned to the period B.C. 350-300: probably the actual occasion of their issue was just before or just after the Battle of the Granicus. An inscription of Zeieia (*Mittheilungen*, 1881, p. 229) makes mention of Artemis—a goddess represented on the coins—and of the temple of the Pythian Apollo.|| A bronze coin published by Dumersan (*Allier Coll.*, p. 80; pl. xiii. 20; cp. *Z. f. N.*, vii. 223) bears a curious symbol encircled by a wreath of corn.

* Imhoof-Blumer, *Monn. gr.*, p. 262, no. 170.

† Strabo, xiii., p. 587.

‡ *Num. Chron.*, 1875, p. 283; p. 285 ff.; the British Museum specimen of the coin is described by Head in *Cat. Ionia*, p. 9, no. 41; pl. ii. 2, where it is ascribed to Zeieia or to Sicyon.

§ Lolling, *Mittheilungen*, 1881, p. 229 f.; 1884, p. 58 f.

|| Cp. *Etym. M.*, p. 498, 40:—*Ζεῖλαια* ὀνομασθαι ἀπὸ Ζεῖλός τινος, ἧ διὰ τὸ τὰς ἄλιων ἐν αὐτῇ λίαν εἶναι βέλους.

The coins inscribed **BIPY**, specimens of which are known to have been found in the Troad, are no doubt correctly assigned to the place mentioned by Steph. Byz. as *Βίρυτις, Τρωϊκῆ πόλις*. Nothing is known of its site and history. From the coins, the true spelling of the name would appear to be *Birytis*. Stephanus also mentions *Βήριθρος, πόλις Τρωϊκῆ*.

The coins are bronze, of the fourth century B.C. The youthful head on the obverse of Pl. viii. 1, 2, 3 would at first sight appear to be one of the Dioskuri, while the bearded head on Pl. viii. 4, 5 might be called Ulysses. There seems, however, to be some connection between the two types, and the stars on each side of the youthful head, and the triskelis of crescents* (Pl. viii. 5), suggest a solar explanation. Perhaps the heads are of two Kabiri.

Gentinus is only mentioned by Steph. Byz., s.v. *Γεντίνος*, as a city of the Troad founded by one of the sons of Aeneas. Its coins (Pl. x. 9-11) are bronze of the fourth century B.C., with types Apollo, Artemis (?), and bee.

TENEDOS.

The earliest coinage of the island of Tenedos appears to extend from *circa* B.C. 550 to about the time of the Peace of Antalcidas, B.C. 387. There is then an apparent cessation of coinage until after B.C. 189, when Tenedos—like other cities of Asia Minor—issued flat tetradrachms of Attic weight. Before the age of Pausanias the inhabitants had placed themselves under the protection of Alexandria Troas.† Only one Imperial coin of the place is known, of the time of Augustus (Imhoof-Blumer, *Monn. gr.*, p. 270).

* This type occurs also at Thebe in Mysia (Brit. Mus. Cat. *Mysia*, p. 179), at Rhœteium and at Megara (B. M. Cat. *Attica*, Pl. xxi. 3). On the Kabiri in the Troad, see T. Friedrich, *Kabiren und Keilinschriften*, Leipzig, 1894, pp. 51, 52, 75.

† Paus., x. 14, 2.

The types of the coinage from first to last (and almost without exception) consist of a janiform head on the obverse, and a double-axe on the reverse (Pl. xvii.). A formal explanation of these coin-types is given by Aristotle in a passage preserved by Steph. Byz. s.v. *Τενέδος*:—*ἢ μᾶλλον, ὡς φησιν Ἀριστοτέλης ἐν τῇ Τενεδίῳ πολιτείᾳ, ὅτι βασιλεῖς τις ἐν Τενέδῳ νόμον ἔθηκε, τὸν καταλαμβάνοντα μοιχοῦς ἀναιρεῖν πέλεκυ ἀμφοτέροισι. Ἐπειδὴ δὲ συνέβη τὸν υἱὸν αὐτοῦ καταληφθῆναι μοιχῶν, ἐκύρωσε καὶ περὶ τοῦ ἰδίου παιδὸς τηρηθῆναι τὸν νόμον· καὶ ἀναιρεθέντος, εἰς παροιμίαν ἔλθειν τὸ πρῶγμα ἐπὶ τῶν ὁμῶς πραττομένων. διὰ τοῦτό φησι καὶ ἐπὶ τοῦ νομίσματος τῶν Τενεδίων κεχαράχθαι ἐν μὲν τῷ ἑτέρῳ μέρει πέλεκυν, ἐπὶ δὲ τοῦ ἑτέρου δύο κεφαλὰς, εἰς ὑπόμνησιν τοῦ περὶ τὸν παῖδα παθήματος.*

While Aristotle thus connects the double-axe with the enactment of a Tenedian king who punished adulterers—and his own son—by beheading, a curious explanation, given in Suidas, connects the double-axe with the stern law-giver of Tenedos (whom he names *Tennes*) in another way:—*Τενέδιος ἄνθρωπος· ἐπὶ τῶν φοβεράς ὄψεις ἔχοντων. ὁ γὰρ Τεννης ἐνομοθέτησεν ἐν Τενέδῳ ἄνθρωπον πέλεκυν ἔχοντα ἵστασθαι κατὰ νότον τοῦ κριτοῦ, καὶ τὸν μάτην λέγοντα ἀλισκόμενον πλῆττειν.*

Pansanias (x. 14, 1, &c.) gives yet another explanation. Commenting on the dedication at Delphi of Tenedian *πέλεκεις*, he states that, according to old tradition, these axes were connected with an incident in the life of *Tenes*, the *κτίστης* of Tenedos, who had cast his father *Kyknos* adrift by cutting with an axe the rope that moored his ship to the island.*

* On the proverbial expression *Τενέδιος πέλεκυς*, see Steph. Byz. s.v. *Τένεδος*, and cp. Cic., *Ep. ad Quint.*, ii. 11, "Tenediorum igitur libertas securi Tenedia percussa est." The founder *Tenes* (or *Tennes*) had a temple and statue at Tenedos, and was honoured with sacrifice till a late period of Tenedian history: see *Diod.*, v. 83; Cic. *in Ferr.*, ii. i. 19.

The passages above quoted show that ancient writers on Tenedos connected the double-axe with some incident in the history—whether real or legendary—of that island. These explanations are considerably divergent, and as elucidations of the town-arms and coin-type of Tenedos must be pronounced of no antiquarian value, and merely aetiological. To modern numismatists it has seemed more in accordance with numismatic analogies to look for the origin of this emblem in ancient religion or cultus.* The double-axe is familiar on coins as the attribute of the Carian Zeus Labrandeus. There can, however, be no question of this Zeus in Tenedos, and Lenormant† has well pointed out that the *πέλεκυς* is also the symbol of Dionysos. Simouides (cp. *Athen.*, x. 84) calls it *Διονύσιοιο ἀνακτος βουφόνου θεράποντα*, and it appears as a type on the coins of Alexander of Pherae, who was a devout worshipper of the Dionysos of Pagasae, *ὃς ἐκαλεῖτο Πέλεκυς*.‡ The coins themselves lend some support to the view that the Tenedian double-axe is connected with Dionysos, for all the silver pieces from circ. a.c. 420 onwards show, in addition to the double-axe on the reverse, a bunch of grapes as a constant symbol.§

Eckhel (*Doct. num. vet.*, ii. 489) explained the janiform head as Tenes and his sister Hemithea, whose adventures are related by Pausanias (x. 14). It must be borne in mind, however, that a

* Prof. W. Ridgeway, in his important work on *The Origin of Metallic Currency*, supposes (p. 318) that the double-axe coin-type is the representative of a primitive barter-currency in axes. In the *Classical Review* for 1892, p. 472, and for 1893, p. 82, I have given my reasons for dissenting from this view.

† Art. "Bacchus," in Daremberg and Saglio, *Dict. des Ant.*

‡ Schol. in Hom. *Il.*, xxiv. 428. Cp. the double-axe as a coin-type of the kings of the Odryse: *Head, Hist. Num.*, p. 240.

§ On still earlier coins of Tenedos we find an amphora accompanying the double-axe (*Num. Chron.*, 1883, p. 80; pl. vii. 15, Greenwell). There is, I believe, no mention in the writers of the worship of Dionysos in Tenedos. Modern travellers, however, vouch for the excellence of its wine: Lacroix, *Nes de la Grèce*, p. 338; Newton, *Travels in the Levant*, i. 271, 272.

janiform head is not peculiar to Tenedian coins. Thus, a janiform female head occurs on a sixth century coin of Athens,* and on contemporary coins of Lampsacus.† This type at Tenedos need not therefore be of special local significance, as Eckhel's explanation would require. Mr. Barclay Head (*Hist. Num.*, p. 476), following a suggestion of Lenormant's,‡ describes the heads as those of Dionysos and Ariadne (or Kore). Yet if Dionysos were intended, the male head would almost certainly be wreathed with ivy. On those coins, however, on which the head is wreathed, the wreath is of laurel and not of ivy. Perhaps, therefore, the heads are those of Zeus and Hera.

PART II.

COINAGE OF AEOLIS.

Of the eleven ancient cities of Aeolis enumerated by Herodotus (i. 149), eight are known to have issued coins:—Cyme, Larissa, Neonteichos, Temnus, Pitane,§ Aegae, Myrina and Grynium. The coinage of these and other Aeolic cities belongs, like that of the Troad, principally to the fourth century *a.c.*, though it is probable that the city of Cyme issued money as early as the seventh century.|| In giving an account of the numismatic history of the cities, they may be conveniently arranged in the following order. First, the important city of Cyme; next, Elaea, Grynium and Myrina, three

§ The coins of Pitane are described in the *Brit. Mus. Catal. Mysia*.

|| Early coins have also been attributed to Aegae: see *infra*, under Aegae.

neighbouring cities, of which the last two were connected politically; next, Aegae and Temnus, two cities lying inland among the mountains, and lastly, Larissa Phriconis and certain other small towns, the sites of some of which are doubtful.

CYME.

Cyme is one of the old Aeolic towns mentioned by Herodotus, and Strabo* refers to it as the largest and noblest of the Aeolian cities, and as having taken part with Lesbos in the founding of about thirty colonies.† Its site is at the modern *Namourt*.‡ Various antiquities of Cyme have been discovered by M. Baltazzi, and by M. S. Reinach, who excavated the necropolis near Cyme in 1881.§ Among other objects found by Reinach were a statue and five archaic bas-reliefs of Kybele, of the end of the sixth century B.C.||

The earliest coins bearing the name of Cyme are silver pieces dating from about the time of the Persian Wars, B.C. 480 (Pl. xix. 8, 9). The attribution to Cyme of silver coins of the seventh century, from the Santorin Hoard (Pl. xix. 4-7; note p. 104 *infra*), seems, however, extremely probable.

An early issue (before B.C. 500) of electrum coins is in Mr. Head's *Historia Numorum*, p. 479, ascribed to Cyme:—

i. *Obv.* Fore-part of prancing horse; beneath, flower?

 =J. P. Six in *Num. Chron.*, 1890, p. 216, no. 6,
 "Chios."

Although the attribution of these particular coins—especially no. ii.—is by no means certain, it is at least curious that tradition seems to point to the existence at Cyme of an early coinage in gold, or rather in electrum. Heraclides Ponticus (*De Rebus publicis*, xi. 3=C. Müller, *Fragm. hist. gr.*, ii. p. 216) states that it was Hermodike, the wife of the wealthy Phrygian King Midas, who instituted Cymæan coinage:—*Ἑρμωδίστην δὲ γυναῖκα τοῦ Φρυγῶν βασιλέως Μίδα, φασὶ κάλλι διαφέρειν, ἀλλὰ καὶ σοφὴν εἶναι καὶ τεχνικὴν καὶ πρώτην νόμισμα κόψαι Κυμαίοις.*

Pollux (ix. 83), who calls her Demodike, daughter of Agamemnon King of Cyme, mentions her together with Pheidon the Argive and others, as a possible claimant to the invention of ancient coinage. She appears also to have been regarded as the sister of the gold river Pactolus.*

In the latter half of the fifth century B.C. Cyme contributed to the Athenian Confederacy the sum of twelve talents, but from about B.C. 450 to 350 there is a curious gap in the Cymæan coinage. From circ. B.C. 350 to the Imperial age Cyme has a continuous coinage, and it was one of the Asiatic cities that issued tetradrachms (Pl. xxi. 4-9) and drachms,† of reduced Attic weight, not earlier than B.C. 190, and probably after it had obtained freedom from the Romans at the conclusion of the war with Antiochus.‡

* See Roscher, *Lexicon*, art. "Hermodike."

† Imhoof-Blumer, *Münz. gr.*, p. 272, no. 221 (Berlin Mus.).

‡ Polyb., xxii. 27; *Ist.*, xxxviii. 39.

The autonomous coins of Cyme present three principal types, which make their appearance in such a way as to suggest that all three had an equal claim to be the representative badges of the city. These types are the eagle (and eagle's head), the half-horse (and horse), and the vase with one handle. No human head occurs on the coinage till *circ.* B.C. 250.

Leaving out of view, for a moment, the seventh century money with the half-horse (Pl. xix. 4-7), we find that the earliest type is the eagle's head, which appears B.C. 480-450 (Pl. xix. 8, 9). In the period B.C. 350-300, the eagle maintains its place, but the half-horse appears (Pl. xix. 10), and also (on the *Æ*) the vase (Pl. xix. 13). These three types are found (Pl. xx. 1-12) till *circ.* B.C. 250, when the eagle disappears and the half-horse (later a horse) is represented with the vase as its constant accompanying symbol (Pl. xx. 13-15). The meaning of the three types cannot be determined with certainty. If the seventh century coins (Pl. xix. 4-7) are really of Cyme, the Cymean horse-type must have originated at the early period when animal types—often to us of doubtful significance—were almost universal on Greek money. It has been suggested that the horse at Cyme is connected with Poseidon, a god who undoubtedly appears on the Imperial money of the city* (p. 120, no. 142; p. 122, no. 150; p. 123, no. 161). But it might be argued with almost equal plausibility that the horse-type was connected—at any rate by the later inhabitants of Cyme—with the naked youth who appears on the Imperial coins standing beside a horse (Pl. xxiv. 7, 11)—a figure resembling the hero Cyzicus on Cyzicene coins.†

The vase (Pl. xx. 6, &c.) is one of very unusual form, but Dr. Birch's suggestion ‡ that it is a vessel called **KYMIALLION**, and

* As to the meaning of the horse-type on coins, see Head, *Cat. Central Greece*, pp. 1, li., especially in connexion with coins attributed to the Euboean Cyme.

† See note to no. 153, p. 122 *infra*.

‡ *Num. Chron.*, iii., p. 93 l.

thus a *type parlant* of Cyme (*Κύμη*), is far from satisfactory. I may point out that a possible clue to the interpretation of the type may be found in the reverses of the later autonomous bronze of Cyme, which show the vase in question placed between two branches of laurel (Pl. xxii. 2). On the obverse of these coins is a head of Artemis, and on another coin of the same period a head of Apollo occurs. The vase of the Cymæan coins may, therefore, have been in some way locally connected with Apolline myth or cultus.*

On the Imperial coins the Amazon Cyme, the reputed foundress of the city, frequently appears, holding a globe and a trident (Pl. xxii. 7, 14; xxiii. 3, 9). Her head is first seen on the autonomous coinage *circ. a.c.* 250 (Pl. xx. 14; *cp.* Pl. xxi. 1-9).

Other Imperial types relate to Zeus, Poseidon, Apollo, Athena, Asklepios, Isis, the Hermos, and a local stream, the Xanthos (Pl. xxii. 13). An interesting coin (Imhoof-Blumer, *Monn. gr.* p. 273, no. 244^a) represents Homer and his mother, Critheis, a native of Cyme. (*Cp. infra*, Pl. xxii. 10, 11.) The curious coin of Gordian III. (Pl. xxiv. 1) appears to represent an athlete entering the precincts of a temple with a prize urn on his head.

ELAEA, GRYNIUM, MYRINA.

The ruins of Elaea exist near *Klissé-Kenté*, a village on the road from Smyrna to Pergamum, south of the Caicus and north of Grynium and Myrina.† There is reason to suppose‡ that it was an old Asiolic city, though it is not in the list given by Herodotus. According to the registers of the

ELAEA.

* The inventories of the temple of Apollo at Delos mention among the *anathemata* a large number of vases called by a great variety of names: see Homolle, *Bull. corr. hell.*, vi., p. 108 ff.

† S. Reinach in *Bull. corr. hell.*, x., 1886, p. 329; Pattier and Reinaud, *Nécropole de Myrina*, p. 39; p. 43, &c.

‡ Thraemer, *Pergamos*, p. 190 f.

tribute of the Athenian Confederacy, B.C. 454-425, Elaea paid 1000 drachms, while its neighbour Myrina paid six times that amount. Its coinage appears to begin about the middle of the fifth century B.C. (Pl. xxv. 1-3), and it also issued coins in the fourth century (Pl. xxv. 5-8). Under the Pergamene Kings, and probably at an early period of their rule,* it became the port of Pergamum. There seem to be no coins that can with certainty be assigned to Elaea between the reigns of Philetærus and Augustus. Under the Empire, the town resumed its coinage in bronze.

The earliest coin-types relate to the goddess Athena and probably also to Demeter. According to a legend recorded **Types.** by Strabo (xiii. p. 623), Elaea was founded by the Athenians who went with Menestheus to the siege of Troy. Under the Pergamene Kings special cults of Asklepios Soter and of Zeus Soter—doubtless introduced from Pergamum—appear to have been of importance at Elaea.† The Imperial types relate principally to Demeter or Persephone (Pl. xxv. 10-15; xxvi. 1, 3, 5). There is an interesting series of types of this class resembling those on coins of Cyzicus and of the Egyptian Alexandria. The sacred kalathos and the flaming torches entwined by serpents are especially noteworthy (cp. note, p. 129 *infra*).

A curious reverse type of M. Aurelius (Pl. xxvi. 2) consists of a standing figure of Asklepios, having on one side a poppy-head and ears of corn and on the other an olive-tree. The goddesses Demeter and Athena—or perhaps the sacred precincts of their temples—are in this way evidently symbolized. Another remarkable coin of M. Aurelius in the Vienna Collection (see Imhoof-Blumer, *Monn. gr.*, p. 274, no. 236, with cut) represents four

* Thraemer, *loc. cit.*

† Cp. Decree of Elaea relating to Attalus, B.C. 138-133, published by Fränkel, "Die Inschriften von Pergamum," in *Die Altert. von Perg.*, viii., 1; no. 246, p. 153 ff.:—Ὁ τῶν ναῶν τοῦ Σωτήρος Ἀσκληπιοῦ—τῶν τοῦ Διὸς [τ]οῦ Σωτήρος Βασιδῶ.

fishermen opening the lid of a chest which they have dragged up in their net. From the chest a female figure is seen issuing. This type has been well explained by F. Marx (*Mittheilungen des d. arch. Inst. in Athen*, x., 1885, p. 21 ff.) as relating to Auge, a priestess of Athena, who, by order of her father Aleus, was placed in a chest (*λάβραξ*) together with her son Telephus, and thrown into the sea. According to Euripides,* the chest, under the providence of Athena, was fished up at the mouth of the Caicus, and Auge was chosen to be the wife of Teuthras, King of Mysia.

Grynium (north of Myrina) is mentioned by Strabo (xiii. p. 622)

GRYNIUM.

as being 40 stadia from Myrina and 70 from Elaëa.

It is supposed to have been situated near the ruin called *Tohifout-Kalassi*.† Strabo describes it as a *πολίχμιον* dependent upon Myrina. Like Myrina, it was one of the eleven ancient cities of Aeolis (Herodotus, i. 149). It was given, together with Myrina and two other towns, to Gongylus I. the Eretrian, *circa* *s.c.* 475, and in *s.c.* 399 was in the hands of Gongylus II.‡ In *s.c.* 306 it was ravaged by Parmenion, the general of Alexander.§ Its only coins are bronze of the third century *s.c.* The reverse-type of these is a mussel-shell (Pl. xxvi. 8, 9), a device familiar to us also on coins of Cumae in Italy. Pliny (*N. H.*, xxxii. 6, 21 ed. Sillig.) mentions *ostrea* in the neighbourhood of Grynium and Myrina:—"Ostrea . . . gaudent dulcibus aquis et ubi plurimi influunt amnes . . . Gignuntur tamen et in petrosis carentibusque aquarum dulcium adventu, sicut circa Grynium et Myrinam."

Grynium was celebrated for its ancient oracle (*μαντείον ἀρχαίων*) and its costly marble temple|| of the Apollo known as the

|| Strabo, xiii., p. 622.

Grynean Apollo (*Γρύνειος Ἀπόλλων*, Steph. Byz.; "Gryneus Apollo," Virg., *Aen.*, iv. 345). The temple possessed the right of asylum,* and connected with it was a beautiful grove (*Ἀπολλωνος κάλλιστον ἄλσος*, Paus., i. 21, 9; Virg., *Ecl.*, vi. 72), in which Apollo was fabled to have met the Amazon Gryne,† and wherein he was honoured with worship. A head of this Apollo appears on the obverse of the coins of Grynium (Pl. xxvi. 8, 9), and a standing figure of the same god, holding patera and laurel-branch, frequently appears on the coins of Myrina (Pl. xxvii. 1-6).

Myrina, now *Kalabassary*, was situated on the Pythikos (*Kodja-Tchai*).‡ It was one of the eleven ancient cities

MYRINA.

enumerated by Herodotus (i. 149), and, like several

other Aeolian (and Ionian) cities, was reputed to have been founded by and named after an Amazon (Myrina). It lay too near to Cyme to attain much importance. From B.C. 454 to 425 Myrina paid to the Athenian Confederation the sum of one talent, while Grynium (the small town dependent upon it) furnished from 1000 to 2000 drachms. The contribution of Cyme was twelve talents. Myrina was a city which, together with Grynium, Gambrium, and Palaegambrium, had been given, *circ.* B.C. 475, by Xerxes to Gongylus I. the Eretrian.§ On the death of Gongylus (B.C. 425?) his son Gorgion became despot of Gambrium and Palaegambrium, and his other son Gongylus (II.) despot of Myrina and Grynium, and in B.C. 399 the two brothers are found ruling over their respective cities. Coins bearing the name of Gorgion were struck at Gambrium,|| but no coins have come to light bearing the name of Gongylus II. at Myrina or Grynium.

* Pottier and Reinach, *op. cit.*, p. 54, note 2.

† Servius ad. Virg. *Aen.*, iv. 345.

‡ For a full account of Myrina and the excavations conducted there, see the valuable work of E. Pottier and S. Reinach, *La Necropole de Myrina*, Paris, 1887.

§ Cf. Babelon, *Mélanges num.*, ii., p. 196.

|| See Babelon, *loc. cit.*

The earliest coins of Myrina do not appear to have been struck before *circ.* B.C. 300,* and the bulk of the coinage belongs to the second and first centuries B.C., when Myrina was apparently within the dominions of the Pergamene kings.† The terra-cottas and other objects discovered in the necropolis of Myrina by Pottier and Reinach are also chiefly of this period.

The money of the second and first centuries B.C. consists of an extensive coinage of flat tetradrachms and drachms‡ of reduced Attic weight (Pl. xxvii. 1-6); of an issue of Alexandrine silver, and of a bronze currency (Pl. xxvii. 7, 8). The first issue of the tetradrachms and drachms probably took place *circ.* B.C. 196, when the Romans conferred freedom on several Asiatic cities, after the defeat of Philip V.§ The types of the tetradrachms—the varying style of which is discussed in a note in the *Catalogue*, p. 135 *infra*—relate to the Apollo worshipped at Grynium (*see* under “Grynium,” *supra*). The “town-arms” of Myrina would appear to have been an amphora, as this device is seen as a constant symbol on the tetradrachms, and as the type of the autonomous bronze (Pl. xxvii. 7, 8). The amphora occurs also on a leaden weight in the British Museum|| inscribed **MY**, and in all probability of Myrina.

MM. Pottier and Reinach, in their excavations in the necropolis of Myrina, found many specimens of its bronze coinage. These were

* On these coins (of silver), see Imhoof-Blumer in *Zeit. für Num.*, iii., pp. 321-322. There are no specimens in the British Museum.

† Cf. *Bull. corr. hell.*, v., 283.

‡ The drachms are much rarer than the tetradrachms.

§ This statement is based on Livy, xxxiii. 30: some critics, including MM. Pottier and Reinach (*op. cit.*, p. 49), after confronting Livy with Polybius, xviii. 26-27, maintain that Myrina in Lemnos and not the Aeolian Myrina was the city upon which freedom was conferred. Whatever may be the correct interpretation of the passage, the numismatic evidence shows that the Aeolian Myrina certainly followed the example of the other Asiatic cities which issued light Attic tetradrachms after *circ.* B.C. 197.

|| Purchased for the Collection in 1893.

usually in poor condition, and were discovered in the graves, generally near the head of the deceased. Not a single example of the tetradrachms was discovered, a circumstance from which we may perhaps argue that the silver coins of Myrina of this class had little circulation locally. Borrell* has already remarked that the tetradrachms of Smyrna, Myrina, Cyme, Labedus, Magnesia ad Maesandrum and Heraclea Ioniae "are rarely found near their places of origin, but, with few exceptions, are brought from different parts of Syria."

Myrina suffered from the earthquakes in the time of Tiberius and again under Trajan, but after each disaster was rebuilt. Its Imperial coins—usually with Apolline types—extend to the time of Gallienus (Pl. xxviii. 1-7).

ÆGÆE, TEMNUS.

Ægæe, like Temnus, lay inland among the mountains. Its

site was fixed at *Nemrud Kalessi* on the river

ÆGÆE.

Kodja-Tchai (the ancient Pythikos) by Ramsay, Reinach and Baltazzi, who visited it together in 1881.† The place has subsequently been explored by M. Clerc (*Bull. corr. hell.*, 1886, p. 275 ff.; 1891, p. 213 ff.), and by Bohn and Schuchhardt (*Altertümer von Ægæe*, Berlin, 1889), and remains have been discovered of temples, a theatre, stadion, market building and bouleterion.‡

Ægæe was one of the old Æolic cities (Herodotus, i. 149, *Æγαῖαι*), but though its territory was wide, it was never a place of political and commercial importance. It does not appear in the

* *Num. Chron.*, vi., p. 156.

† Ramsay, *Hist. Geog.*, p. 13; p. 431; p. 458, and his paper in *Journ. Hell. Stud.*, ii., p. 292 f. Cp. Kiepert, *Formas*, map ix., p. 3, note 29.

‡ See Bohn and Schuchhardt, *op. cit.* The extensive necropolis has been explored by M. Clerc.

Athenian tribute-lists, and, like Temnus, was independent of Persian rule *circ.* B.C. 400. An inscription of the end of the fourth century B.C.* records a convention between the inhabitants of Aegae and the people of "the district of Olympus," regarding the dues to be paid by the owners of goats and sheep in passing from one territory to the other. Aegae is mentioned several times by Polybius, and we hear of its suffering in a war between Attalus I. and Prusias II. P. Servilius Isauricus, Proconsul of Asia in B.C. 46, erected or restored several of its buildings.† It was one of the Aeolian cities destroyed by the earthquake in A.D. 17 and subsequently restored by Tiberius.

The earliest coins that can be attributed to Aegae with certainty are of the third century B.C. (Pl. xviii. 1-3). An early electrum coin with the type of a goat's head has, with hesitation, been assigned to the place by Mr. Head,‡ and Borrell has, with greater probability, attributed to it the following silver coin, "of primitive fabric," "discovered with a few others between Myrina and Cyme":—

Obv. Goat's head and neck r.

Rev. Two lozenge-shaped indentures.

R Size 2. Wt. 12½ grains.

"My cabinet and Brit. Mus."§ (Borrell in *Num. Chron.*, vii. p. 45, no. 1, and Borrell's MS. *Catal.* in Brit. Mus.)

Aegae was one of the Asiatic cities that issued spread tetradrachms in the second or first centuries B.C. (Pl. xviii. 4) and had a bronze coinage of Imperial times. The principal divinities repre-

‡ Head in *Num. Chron.*, 1875, p. 293: the coin is described in Head, *Cat. Ionia*, p. 11, no. 54, among the "Uncertain electrum."

§ I cannot find this coin in the British Museum Collection, and Borrell's description would appear to be so far incorrect.

seated are Apollo—probably the Apollo Chresteros of Aegae (see *infra*, p. 98, note to no. 22),—Zeus, and Athens, whose appearance is probably due to Pergamene influence.*

Temnus was on the hill-side above the right bank of the Hermus.

TEMNUS. Professor Ramsay identifies it with the extensive ruins north of the Turkish villages *Hassân Aghâ* and *Dere Kewî*.† It was east of Neonteichos. Temnus was independent of Persian rule *circa* B.C. 400, and its earliest coins (Pl. xxviii. 9) may be assigned to the fourth century. An inscription found at Pergamum, and assignable to the early part of the third century B.C.,‡ records a treaty between Pergamum and Temnus, conferring *πολιτεία*, &c., on citizens of Temnus living in Pergamum, and on Pergamene citizens living in Temnus. At a later date Temnus is brought into relations with the Attalids.§ Bronze coins were issued during the third, second, and first centuries B.C. (Pl. xxviii. 10-12; pl. xxix. 2). There was also an issue of Alexandrine coins and a small coinage of autonomous silver (Pl. xxix. 1).

The types of the autonomous coins are principally Dionysiac. On the late autonomous and on the Imperial coins Athena is seen holding a figure of Nike, and sometimes also a bunch of grapes (Pl. xxix. 8). The introduction of Athena may be due to Pergamene influence. The bunch of grapes held by Athena is not an

* As to the few \AA coins found at Aegae, see *Claro, Bull. corr. hell.*, 1891, p. 237. The coin there described as of "Tabao de Carie" appears to be rather of Temnus in Aeolis, like the coin described *infra*, p. 143, no. 10, with ΔH . Among the coins was a bronze piece of Prusias II., King of Bithynia.

† W. M. Ramsay in *Journ. Hell. Stud.*, ii., p. 287 f.; *cp.* his *Hist. Geog.*, n.v. Temnus, and Bohn and Schuchhardt, *Altertümer von Aegae*, p. 60. Kiepert (*Vormae*, map ix., p. 3) places Temnus south of the Hermus, at Uludjak.

‡ Fränkel, "Die Inschriften von Pergamon" in *Altertümer von Perg.*, viii., l. no. 5.

§ Fränkel, *op. cit.*, no. 5 and no. 157.

attribute of that goddess, but the "town-arms"—or at any rate the early coin-type—of Temnus. An exact parallel occurs at Perperene in Mysia,* on a coin of Antoninus Pius, where Telesphoros holds a bunch of grapes, an object which appears as the type of the autonomous coins of Perperene, though it is not elsewhere found as an attribute of Telesphoros.

Kybele and the river Hermas (Pl. xxix. 10) are among the other Imperial types. Coins of the time of Augustus (Pl. xxix. 6, 7; p. 146) bear the name and portrait of the Proconsul, Asinius Gallus (u.c. 6-5), son of the well-known Asinius Pollio, the friend of Virgil and Horace.

LARISSA, NEONTRICHOS, BOEONE, &c.

Larissa Phriconis was in the Hermus valley, nearly nine Roman miles from Cyme. Its site is described by Professor W. M. Ramsay† as on a hill known as *Bou-rounjik*, where are the remains of Hellenic walls and pottery. Larissa was a strong place, and one of the old Aeolic cities. Xenophon (Cyr., vii. 1) says that Cyrus settled some Egyptian mercenaries there, and that it was known as the Egyptian Larissa. In B.C. 399 it resisted the attack of the Spartan Thimbron. Its coins are bronze of good style (Pl. xxvi. 10, 11), and are all of the fourth century B.C. After *circ.* B.C. 300 Larissa seems to have lost its importance, and at some time subsequent to the siege by Thimbron its walls were completely levelled to the ground. Strabo and Pliny say that the city was deserted in their time: this statement must relate (as Professor Ramsay has pointed out) to the city on the hill, for there is evidence that a place of the same name

* Wroth, *Cat. Mysia*, p. 169, no. 7; Pl. xxxiv. 3.

† See his account of the history and topography of Larissa in *Journ. Hell. Stud.*, II., p. 280 f., from which the present notice is chiefly abridged. Cp. Kiepert, *Formae*, map ix., p. 3.

lying on the road to Cyme, and probably in the plain, existed in the Imperial age.

Neonteichos was nearly four miles from Larissa Phriconis. Its site is fixed by Professor W. M. Ramsay* near **NEONTEICHOS**. *Yannik Keui*, south-east of Larissa. It was one of the old cities of Aeolis, but apparently only coined money during the second century B.C., when it had come under Pergamene rule and the power of its neighbour Larissa had probably declined. The types relate to Athena (Pl. xxviii. 8). Ramsay has remarked that the Athena head of the regal coinage of the Attalids is found also on the money of several of the cities that were included in their dominions, circ. B.C. 190-133.

No Imperial coins of Neonteichos are known, but Ramsay states that it is clear from the remains that the place "continued to be a fortress through the Greek and Roman periods, down to a very late date."

The coins inscribed **ΒΟΙΩΝΙΤΙΚΟΝ** are bronze of the fourth century B.C. (Pl. xix. 1, 2). According to H. P. **BOEONE**. Borrell,† specimens are "generally found in Aeolis, and particularly near the Hermus." Borrell and Imhoof-Blumer‡ have pointed out their resemblance to coins of Larissa Phriconis,§ and it may be conjectured that Boeone was an Aeolian town situated near Larissa.

The coins of Autocane (none of which are in the British Museum) are bronze of the fourth century B.C. and later, **AUTOCANE** inscribed **ΑΥΤΟΚΑ**, and with types, Zeus and

§ They also resemble the coins of Placia in Mysia, on the Propontis (Brit. Mus. Cat. Mysia, Pl. xxiv. 1).

Athana. Dr. Imhoof-Blumer* points out the Aeolian style of the specimens and writes :—*Αὐτοκάνη* ou *Κάνη*, *Καρά* ou *Κάρα* était le nom du promontoire, qui s'élève entre Pitane et Atarneus (Strabo, p. 446, 615, &c.), et plusieurs auteurs font mention d'une ville *Κάρα* située près de ce promontoire. C'est à elle que reviennent sans doute les monnaies des *ΑΥΤΟΚΑΡΑΪΟΙ*.

The coins inscribed *ΚΑΜΗΝΩΝ* (pp. 102, 103) are all of the

CAME.

Imperial age. Nothing is known of a town named Came, but there is no ground for identifying it with Cane (*Κάρα* = Autocane). Von Sallet (*Z. f. N.*, xiii., p. 70) and Head (*H. N.*, p. 478) describe the coins of Came under Aeolis, and their arrangement has been adopted in this Catalogue. Such evidence as is derivable from the *provenance* of the coins is, however, rather in favour of an attribution to Mysia, for Borrell states† that two coins of his were found at Adramyteum, and that three coins procured by Cousinéry came from the same neighbourhood.

Tisus, the Titanus of Pliny (*N. H.*, v. 30), was in the neighbour-

TISIA.

hood of Cyme and Aegae.‡ Schuchhardt§ places it at *Uzun-Hassanlı*, south of Aegae and east of Cyme. The coins (Pl. xxix. 12) are bronze of the fourth century a.c., with the head of a river-god, doubtless the river *Τισαῖος* or *Τισσαῖος*, which Schuchhardt supposes to be identical with the Pythikos (now Kodja-Tchai).

Reinach in *Bull. corr. hell.*, vi., p. 206; see also Pottier and Reinach, *Nécropole de Myrina*, p. 34 f. Reinach thinks the town of Titanus may be identified with Guzel-Hissar on an affluent of the Kodja-Tchai (=Pythikos).

PART III.

COINAGE OF LESBOS.

THE coinage of Lesbos—*insula nobilis et amoena*—was chiefly issued at its two most important cities, the powerful rival states of Mytilene and Methymna.* The three smaller Lesbian towns, Antissa, Eresus, and Pyrrha, were places of some importance, and issued coins, and a coinage has also been attributed to Aegirus and Nape. The ancient town of Arisba was destroyed by its neighbour Methymna before the time of Herodotus, and never appears to have coined money.

The attribution to Lesbos of the billon coins described on pp.

150-155 *infra* (Pl. xxx. ; xxxi. 1-5) may be regarded as well established. A considerable number of the

LESBOS.

Lesbian Billon
Coinage.

specimens in the British Museum were procured by Sir Charles T. Newton when Vice-consul at

Mytilene, and, according to information in the possession of Mr. Maximilian Borrell,† specimens similar to our Pl. xxx. 1, 11, 22, &c., are usually discovered in the vicinity of the fortress at Mytilene. The types of many of the coins agree with those of the silver and electrum of Lesbos, and the inscriptions on the inscribed pieces likewise favour the attribution (*e.g.*, p. 151, no. 14, with $\Lambda\epsilon\Xi$).

The coins are struck on two standards, in one of which the stater weighs about 236 grains, in the other about 171 grains. Mr. Head (*Hist. Num.*, p. 483) describes these as the Phoenician and Persian standards. The earliest coins (which are of the Phoenician standard) must be at least as early as B.C. 550, and are thus older by about

* A general account of the history and geography of Lesbos would exceed the limits of this Introduction, but information is abundant and easily accessible in many of the works enumerated in the bibliography of Lesbos prefixed to Koldewey's valuable work, *Die antiken Baureste der Insel Lesbos*, pp. 1, 2.

† *Nouv. Cbron.*, 1865, p. 341.

fifty years than the earliest silver coinage of Lesbos, *i.e.*, that issued at Methymna.* The billon coinage appears to cease about B.C. 440, when the Mytilenean silver makes its first appearance. Lenormant† has pointed out that the word "potin" has often been erroneously applied to this series. Potin denotes a mixture of bronze, tin, lead, &c., without the addition of silver. Billon, on the other hand, contains a certain admixture of silver. The billon of Lesbos contains, according to Lenormant, not more than 40 per cent. of fine silver.

It is generally admitted that the *boar* on these coins is the badge of Methymna, and the *calf* of Mytilene. The appearance of the inscription ΛΕΞ on the boar's-head coins (p. 151, no. 14; p. 152, no. 21) seems to indicate that they formed part of a currency of a monetary convention of two or more Lesbian towns, though Methymna was probably the mint-place. No. 11, p. 151, with the boar's-head type, is inscribed Α, a monogram in which Brandis sees the name of Antissa, the neighbour of Methymna.

The early coins with the *lion-types* (Pl. xxx. 2, 3) may be assigned to Mytilene, of which city the lion is a type; while those with the *gorgoneion* (Pl. xxx. 4) may belong to Methymna, for the gorgoneion occurs on silver coins attributed, with probability, to that city (p. 177, nos. 5, 6, *infra*). The coins with *male head* (Pl. xxxi. 1, 2, Apollo?), *Orpheus?* (Pl. xxxi. 3), and *female and lion heads* (Pl. xxxi. 4, 5) may, on grounds of style and type, be assigned to Mytilene.

The attribution of the coins with the *human eyes* (Pl. xxx. 14-18) and the *negro's head* (Pl. xxx. 19) is difficult, as is also the explanation of the types. On Pl. xxx. 13, the eye is placed beside the boar's head of Methymna, and on a coin described by Fox (*En-*

* See also the silver coinage of an Uncertain Lesbian Mint, p. 173 *infra*.

† *La monnaie dans l'antiquité*, i., p. 197.

gravings, &c., ii. p. 10; pl. iv. 62) the eyes form the reverse and the negro's head the obverse. This interchange of types would seem to be another proof that the billon coinage was struck for general circulation in Lesbos and as the result of a monetary convention.

The circumstances under which a coinage of electrum (ῥῶ Lesbian Electrum χρυσίον) took place at Mytilene are made known

Coinage. to us, at least in part, through the fragment of a Mytilenean inscription excellently commented on by Sir. C. T.

Conditions of Newton in the *Transactions of the Royal Society* issue. of *Literature* (London, 1866, vol. viii., 2nd ser., p. 549).*

So far as can be made out, the inscription consists of an agreement, entered into probably *circa* B.C. 400, between Mytilene and Phocæa in Ionia, respecting a common coinage in electrum, of a fixed weight and fineness. Each city, in turn, was to coin for a year, and it was decided by lot that the Mytileneans were to begin. A tribunal consisting of magistrates of both cities was appointed to try any monetary officer charged with debasing the coinage. The trial of any such officer was to take place within six months of the expiration of his term of office, and the punishment for debasing the coin with criminal intention was death.

The coinage referred to doubtless consisted of Staters and Sixths.† The gold (or electrum) staters of Phocæa are often mentioned in inscriptions, though none have yet come to light.‡ The stater coinage of Mytilene is only known to us from the unique specimen figured in Pl. xxxii., no. 1.

* See also Conze, *Reise auf der Insel Lesbos*, p. 12; pl. vi.; Blass and Dittenberger, *Hermes*, xiii. 382, 390; Clemm, *Rhein. Mus.*, xxxiii. (1878), 606; B. Weil, *Studien auf dem Gebiete des antiken Münzrechts*, Berlin, 1893, p. 14.

† Head, *Catal. Ionia*, p. xxii.

‡ Except, of course, the staters of the earliest coinage of the city: see Wroth, *Nom. Chron.*, 1894, p. 14, no. 17.

The Sixths of Phocæa marked with the phoca are well known, and various electrum Sixths inscribed **M** and **ΛΕ** have long been recognized as the coinage of Mytilene, the chief mint of Lesbos.

Brandis and others have assigned similar but uninscribed Sixths to various Asiatic cities, which are supposed to have issued them either independently or in alliance. But, as Gardner,* Head† and Six‡ have shown, it is much more probable that the electrum Sixths, such as those figured in our Plates xxxii.-xxxiv., are the product of a single mint—Mytilene. It is more difficult and perhaps, on our present evidence, impossible to decide whether these Sixths were coined exclusively for the use of Mytilene and other Lesbian towns. M. Six§ is inclined to suppose that some of the coins may have been minted at Mytilene at the expense and for the use of non-Lesbian towns and dynasties.

M. Six (*loc. cit.*) assigns the electrum Sixths to the period b.c. 550-330; Mr. Head (*Hist. Num.*, pp. 484-485) to b.c. 450-387. I would propose, though not without hesitation, to make the limits of this coinage b.c. 480-350. Mr. Head tells me that, after an examination of the British Museum series as re-arranged for the present *Catalogue*, he is now of opinion that his downward limit of date must be fixed at *circ.* b.c. 350, and that he is willing to extend his upward limit to an earlier period.

M. Six (who is of opinion that the types were changed annually) argues, from the number of types noted by him,|| that the coinage must have extended over two centuries or more. He considers that the style of the earliest and the latest coins is consistent with the assignment of them to *circ.* b.c. 550 and *circ.* b.c. 330 respectively. M. Six specially calls attention to the archaic char-

* *Num. Chron.*, 1882, p. 223 f.

§ *Num. Chron.*, 1890, p. 196 f.

|| *Num. Chron.*, 1890, p. 197, note 36.

acter of the head of Herakles on the reverses of Pl. xxxi. 16-19, yet even this head is found in conjunction with obverses which could hardly be assigned to so early a date as B.C. 550.

Among the extant Sixths of Lesbos there are no specimens which (at least to my eye) proclaim themselves as belonging to the sixth century—no specimens, in fact, which can be classed as contemporaneous with the early Sixths of Phocaea, the coinage of which undoubtedly begins in the latter half of the sixth century.* As to the downward limit of the Mytilenean coinage it is difficult to speak positively, but I am inclined—with Mr. Head—to favour the date B.C. 350 rather than B.C. 300.

The Sixths may be arranged (as in Mr. Head's *Historia Numorum*, pp. 484, 485) in three series, according to the technique of the reverses. In Series I. (Pl. xxxi. 6-28) the reverse-type is in intaglio; in Series II. and III. it is in relief and is placed in an incuse square. Series III. (Pl. xxxiii.; Pl. xxxiv.) is distinguished from II. (Pl. xxxii.) by having the type enclosed in a linear compartment such as is found also on the silver coins of Mytilene (Pl. xxxvii. 20-23; Pl. xxxviii. 1, 2), which (if rightly dated in this *Catalogue*) make their appearance about B.C. 350, when the electrum coinage comes to an end. In Series I. animal types predominate. Certain types, as the lion's head, calf's head, and ram's head, are found also on the Phocæan Sixths.† I have not seen noted in print—what I think, however, is an intentional device of the mint-master—that the obverse types of the Lesbian Sixths (in all three series) are almost invariably turned to the right, while the types of the Phocæan Sixths face to the left.

The Sixths of Series II. and III. form one of the most beautiful coin-series of the ancient world. This will be evident from a glance at

* Head, *Catal. Ionia*, p. xxi. and pl. iv., no. 1, &c.

† The Phocæan Sixths have an incuse square (without type) for reverse.

Plates xxxii.-xxxiv., on which the majority of the British Museum examples are represented. Certain specimens may, perhaps, be singled out for freshness and simplicity of style (Pl. xxxii. 1 *obv.* stater; 19-22 *obverses*; Pl. xxxiii. 22, 23, 26, 27 *obverses*), and for delicacy of treatment* (Pl. xxxii. 10 *obv.*; Pl. xxxiii. 2 *obv.*).

It seems impossible to identify with certainty a large number of the heads, though some of the principal Greek divinities can easily be recognized:—Apollo, Dionysos (cp. the Maenads, Pl. xxxiii. 10; xxxiv. 30), Athena, Persophone, Demeter, Hermes, Hera, Zeus Ammon, Asklepios (or Zeus), Herakles, Nike, Pan?, Kybelo?, Artemis?, Ares? Several of these divinities are seen on the Phocæan Sixths, and several heads on the latter series bear a decided resemblance in style to the heads on the Lesbian Sixths (see Brit. Mus. Cat. *Ionia*, pl. v.). The head on no. 5 (cp. 6, 7) of our Pl. xxxiii. has been called Sappho, but this explanation, as will be shown below (Mytilene, Imperial coinage), is untenable, and Aphrodite is probably represented.

The exact assignment of the silver and bronze coins *circa* B.C. 330-250? with the legend ΑΙΟΛΕ (Pl. xxxv. 3-6) is somewhat doubtful, but the attribution of Dr. Imhoof-Blumer, who has discussed the question in the *Zeitschrift für Numismatik* (iii. p. 312 ff.), is undoubtedly the best yet proposed. According to his view the coins were struck for circulation in Lesbos, and their mint-place was probably Methymna.

MYTILENE.

The types of the earlier autonomous coins of Mytilene (a.c. 440-200) relate principally to Apollo. The worship of this god prevailed in many parts of Lesbos,† and

MYTILENE.

* To which a photograph does not do justice.

† Plehn, *Lesbiacorum liber*, pp. 115-117.

by the Mytileneans he was honoured under the name of *Μαλαίειος*. The female head on the bronze coins (Pl. xxxviii. 4-7; cp. xxviii. 14-16) is perhaps intended for Aphrodite. The view that it is a head of Sappho is discussed below, under "Sappho." On the later autonomous coins (2nd and 1st centuries B.C.) the types (Pl. xxxviii. 9-24) refer to Zeus Ammon, Artemis, Apollo and Helios; but the most noteworthy representation is the terminal figure of Dionysos placed, on some specimens, on the prow of a vessel (Pl. xxxviii. 9, 10, 12-19). The story of the finding by fishermen of Methymna of a *xoanon* of Dionysos is referred to below (p. lxxvi.). The Dionysos of the Mytilenean coins is, in fact, just such a type as we should have expected at Methymna, and belongs to a well-known series of archaic representations of the god of wine.* Festivals called *Θεοδαΐσια* were held at Mytilene in honour of Dionysos,† and a distribution of wine to the magistrates and other functionaries took place during their celebration.‡

On the Imperial coins (Pl. xl.-xliii.) the Tyche of Mytilene (who is often represented, Pl. xl. 9, *obv.*; xlii. 3, 5, &c.) holds the Dionysiac simulacrum, apparently because Dionysos was the chief divinity of the city. The importance of Artemis at Mytilene under the Empire is shown by her frequent appearance on the coins (Pl. xlii. 9, 12, &c.). An inscription found near Mytilene on the road to *Thermi* bears on one side the words:—*Μεγάλη Ἄρτεμις Θερμιά*, and on the other:—*Μεγάλη Τύχη Μυτιλήνης*.§

Types relating to the Emperors are of frequent occurrence

* Roscher, *Lexicon*, p. 1090 f.; C. Boetticher, *Baumkultus*, Plates, 15, 16.

† *Bull. corr. hell.*, iv., p. 426.

‡ Dionysos was also worshipped in Lesbos under the name of *Βηρησάγιος* or *Βηρησις*: see *Bull. corr. hell.*, iv., 445, 446; Koldewey, *Lesbos*, p. 63 f.

§ *Bull. corr. hell.*, iv., p. 430: on Artemis Thermia, see further, Plehn, *Lesb.*, p. 117; *Mittheilungen des deut. arch. Inst. in Athen*, xi., pp. 251, 284.

(Pl. xli. 5, 6, 9, &c.). Asklepios and some other divinities are also represented.*

The series of imperial coins without the imperial name or effigy is of exceptional interest (Pl. xxxix., xl.), from the representation upon them of various persons connected with the history of Mytilene. Of these personages five are well known—Pittacus, Alcaeus, Sappho, Theophanes and Lesbosax.

A rare coin in the Bibliothèque nationale at Paris† shows on the obverse the head of Pittacus (ΦΙΤΤΑΚΟΣ *sic*), the famous *αἰσυμνήτης* of Mytilene, *circ.* B.C. 652-569, and on the reverse the head of the poet Alcaeus (ΑΛΚΑΙΟΣ), *circ.* B.C. 606. Alcaeus, as the leader of the oligarchical party, was bitterly opposed to Pittacus, and derided him in his verse. The appearance of the two leaders on the same coin is therefore somewhat curious, although a reconciliation is said to have taken place between them.

Contemporary with Pittacus and Alcaeus, says Strabo (xiii. p. 617), was Sappho—ἡ Σαπφώ, θανμαστόν τι χρῆμα, οὐ γὰρ ἴσμεν ἐν τῷ τούτῳ χρόνῳ τῷ μνημονευομένῳ φανεῖσάν τινα γυναῖκα ἐνάμιλλον, οὐδὲ κατὰ μικρὸν, ἐκείνη ποιήσεως χάριν. The head of Sappho—ΨΑΠΦΩ—appears on Pl. xxxix. 10, and there can be no doubt that the seated female figure playing the lyre (Pl. xxxix. 6, 8) is intended for Sappho, though it cannot be determined whether this representation reproduces some famous statue such as that of Silanion.‡ The lyre on Pl. xxxix.

‡ *Cic.*, *in Ferr.*, iv. 57.

9, 10, 11, would also seem to be an emblem of the poetess, and not, as is usually the case, of Apollo.* Sappho evidently appears on the coins as being—like Pittacus and Alcaeus—a distinguished citizen of Mytilene. Her birth-place was, however, by some claimed for the smaller Lesbian town of Eresus, on the Imperial money of which her head and figure may also be seen.† Pollux (ix. 84) says *Μυτιληναῖοι μὲν Σαπφῶ νομισματι ἐνεχάραττον*,‡ and it can hardly be doubted that he is referring to the Imperial coins now under discussion. Some numismatists have supposed that the head on the Lesbian electrum (Pl. xxxiii. 5-7) and on the autonomous bronze of Mytilene (Pl. xxxviii. 4-7) is intended for Sappho.§ But such a representation is extremely unlikely to occur on coins of the fifth century B.C. or even on those of the fourth and third centuries;|| and I agree with Furtwängler** in considering the head in question to be probably that of Aphrodite.

Cn. Pompeius Theophanes, whose head appears on coins of the
Theophanes.
time of Tiberius (Pl. xxxix. 1),†† was a native of Mytilene, and is well known as the intimate friend of Pompey and as the historian of his campaigns. The Mytileneans owed to his influence with Pompey the freedom of their city

* For other coins representing Sappho, see Büchner in *Zeit. f. Num.*, ix., p. 114 f.

† See Introduction *infra*, under "Eresus."

‡ Cp. Gardner, "Pollux' Account of Ancient Coins," in *Num. Chron.*, vol. i., 3rd ser., p. 290, note 63.

§ Furtwängler, *Meisterwerke der griechischen Plastik*, p. 103, note 4, justly remarks that it is most arbitrary to make the statement in Aristot., *Rhet.* (2, 33), *Μυτιληναῖοι τετιμῆσαν Σαπφῆ σίστην γυναικῶν οὖσαν*, mean that the Mytileneans honoured Sappho by placing her head on their autonomous coins.

|| The head on nos. 5-7, Pl. xxxiii., resembles the head on the Sixths of Phocæa (Head, *Cat. Ionis*, pl. v., 13, 15, 17), on which a representation of Sappho would not be specially appropriate.

** Furtwängler, *Meisterwerke*, p. 103, note 4, and p. 106.

†† Also on a coin of the time of Sept. Severus, Pl. xl. 1. See also Büchner in *Zeit. für Num.*, ix., p. 131; Pl. iv. 16, 17.

(*S.C.* 62),* and after his death divine honours were paid to his memory. Theophanes left a son, Marcus Pomponius Theophanes, who was sent to Asia as procurator by Augustus, and who, at the time when Strabo wrote (*xiii.* p. 618), was one of the friends of Tiberius. On the Mytilenean coins the head of Theophanes (the Elder) first appears in the time of Tiberius, and is inscribed **ΘΕΟΦ.** These coins were probably struck in the earlier part of the reign, for Tiberius, about A.D. 33, put the descendants of Theophanes to death, because their ancestor had been one of Pompey's friends and had received divine honours—*Quodque defuncto Theophani caelestes honores Graeca adulatio tribuerat* (*Tac. Ann.*, vi. 18).

The gratitude of Mytilene to Pompey is expressed in several lapidary inscriptions,† and a marble pedestal from Mytilene‡ records a triple dedication, to Pompey, to Theophanes, and to Potamon son of Lesbonax. Pompey is styled "Benefactor," "Preserver," and "Founder," and the dedication to Theophanes runs:—*Θεοφάνη τῷ σωτήρι καὶ εὐεργέτῃ καὶ κτίστῃ δευτέρῳ τῶν πατριδῶν.*

The Archedamis who appears on the reverse of the coins of Theophanes (*Pl.* xxxix. 1) is unknown, but may be conjectured to have been his wife.

Lesbonax of Mytilene was a rhetorician and philosophical writer of the time of Augustus. He was father of the rhetorician Potamon, who was favoured by Tiberius.

In the triple dedication just referred to we find:—*Ποτάμωνι Λεσβώνιακτο[ς] τῷ εὐεργέτῃ καὶ σωτήρῳ καὶ κτίστῃ τῶν πόλιος.* In another inscription of Mytilene,§ Potamon himself is described as "Preserver," "Benefactor," and "Founder of the City."

* *Plut.*, *Pomp.* 42.

† *Inscriptions in British Museum*, pt. ii., p. 47, no. ccx.

‡ *Inscr. in B. M.*, pt. ii., pp. 47, 48, no. ccxi.

§ *Inscriptions in Brit. Mus.*, pt. ii., p. 48, no. ccxii: see also on Potamon, *C. I. G.*, 2182; *Bull. corr. hell.*, 1880, p. 426; Kaibel in *Ephemeris epig.*, p. 11, no. vii.

On the obverse of the coin in Pl. xxxix. 5 (time of the Antonines) Lesbos is represented in the character of young Dionysos and is styled ΛΕΣΒΩΝΑΞ ΗΡΩΣ ΝΕΟΣ. On the obverse of a coin in the Berlin Museum* he appears as a bearded philosopher (head only) ΛΕΣΒΩΝΑΚΤΑ ΦΙΛ(Ο)ΣΟΦΟΝ. A Mytilenean inscription published (after Cyriac of Ancona) by Kaibel† makes mention of Λεσβώνακτος τῷ φιλοσόφῳ. The standing figure on the reverse of the Berlin coin is probably either Lesbos or his son Potamon.

The following inscription of Mytilene, copied by Cyriac of Ancona, and edited by Kaibel in the *Ephemeris epigraphica*, ii. p. 7, no. i., throws some light on the Julia Procula (Pl. xxxix. 6, 7 *obverses*) and the Flavia Nicomachis, Flavia Nicomachis‡ (Pl. xxxix. 12 *rev.*; 13 *obv.*) represented on the coins:—

Ἄ βόλλα καὶ ὁ δᾶμος Φλ. Πουπλικίαν Νεικομα[χ]ίδα . . . παιῶνα
Δινομαχ[ω] καὶ Π[ρ]όκλ[α]ς τῶν εὐεργετῶν καὶ ἀπὸ προγόνων
εὐεργετῶν καὶ κτ[ί]στῶν τὰς πόλιος ἀμμίων τὰν δι' αἰῶνος πρῶ-
ταν[υ] ἀρετᾶς εὐ[ν]εκα παίσας.

We need not, I think, hesitate to identify the πρότανις Flavia Publicia Nicomachis with the Flavia Nicomachis of the coins, nor is it rash to suppose that her mother Procla is the Julia Procla (Procula) also portrayed on the coins.§ Procula and Nicomachis belonged to a family of Mytilenean εὐεργεταί and κτίσταί, just as did Theophanes and Lesbos, who in another Mytilenean inscription|| are honoured with the same epithets. The coins bearing the

* *Zeit. für Num.*, ix., p. 128; pl. iv. 27, 28.

† In the *Ephemeris epigraphica*, ii., p. 11, no. vii.

‡ Attention was called to this inscription in an article (portions of which are here repeated) on "Portraits of famous citizens of Mytilene," published by me in the *Classical Review* for May, 1894, pp. 226, 227.

§ A Julia Πρόκλα is mentioned in *C. I. G.*, 3370: cp. Pape-Benseler, *Wörterbuch*, s.v. Πρόκλα.

|| *Inscriptions in Brit. Mus.*, pt. ii., p. 47, no. cxxi.

portrait of Procula may be assigned to the time of Faustina I., and those of Nicomachis to a slightly later period, for the first-named portrait resembles the head of the elder Faustina in features and the style of the coiffure, while the second recalls the heads of Faustina the younger, Lucilla and Crispina. Procula and Nicomachis cannot, therefore, be later in date than the Antonines, though, of course, they may possibly have lived at an earlier period.

The Sextus—**CEECTON HPΩA**—whose portrait appears as the obverse of Pl. xxxix. 12 is unknown. He was probably related to Flavia Nicomachis, whose bust appears on the reverse of the same coin.*

The legend **ΔΑΔΑ** (cp. p. 199 *infra*, note), which appears on the obverse of Pl. xxxix. 2, 3, and on the reverse of Pl. xxxix. 4, is presumably the name of the personage represented. The head (Pl. xxxix. 2, 3) resembles that of Matidia, niece of Trajan. The name occurs in a passage of Nicolaus Damascenus (*frag.* 21 in C. Müller's *Frag. Hist. Graec.*, iii., p. 370), in which a Dada† is mentioned as the wife of Samon the Cretan, who was associated with Skamander, the first king of the Trojans. The story of this Dada appears to be Cretan, though it is at least curious that it is stated that Dada, after her husband's death, set out for Πόλιον (ms. Πόληον), a place supposed by some commentators to be Polion, in Lesbos (cp. Steph. Byz., Πόλιον ἐν Λέσβῳ τόπος, ὅπου τὸ ἥρώον Ταυτάλου).

The Dada of the coins is associated with Pankratides. The inscription **ΠΑΝΚΡΑΤΙΔΗΣ** accompanies a young male head (Pl. xxxix. 4 *obv.*) and a youthful male

* He may have been the husband of Nicomachis, but was not her father (see the inser. παιδα Διονομαίχ[ω] καὶ Π[ρ]ομαίχ[ω]).

† Müller in his text reads Δεδα, but in a note suspects—unnecessarily as it would seem—that the true reading is Δάδα.

figure resembling the youthful Asklepios (Pl. xxxix. 2, 3, *reverses*). I take Pankratides to be the name of a man (as in *C. I. G.*, 1955; 2007 l. Add.), and not, as has been supposed,* an epithet of Asklepios.

Mr. Head suggests that Pankratides may have been a Mytilenean physician, who is here represented—after his death—in the character of the god of healing.

The bust of Nausikaa appears on coins of the time of Faustina I.

Nausikaa. (Pl. xxxix. 8, 9). Doubtless some Mytilenean lady is represented, and not the Nausikaa of Homer.

Leukippos. The coin on which the legend ΛΕΥΚΙΠΠΟΣ occurs is in bad condition (Pl. xi. 2). The figure on the reverse seems to be a philosopher, but it is not known that the celebrated philosopher Leukippos was in any way connected with Mytilene. A Leukippos is mentioned (Diod., v. 81) as the leader of a colony which Macareus conducted from Lesbos to Rhodes.

METHYMNA.

The principal type of the coins of Methymna (*Molivo*) is, from first to last (Pl. xxxvi.; xxxvii.), a head of **METHYMNA.** Athena, probably evidencing not only the importance of the worship of this divinity, but also the close political connexion that subsisted between Methymna and Athens.† The

* Von Sallet, in *Zeit. für Num.*, v., p. 330. I believe that the coin in Pl. xxxix. 4, with portrait-head, had not been published when Dr. Von Sallet wrote.

† The boar-type on the early coins (Pl. xxxvi. 6, 7) has not been satisfactorily explained. Among the "Uncertain" specimens in the British Museum is a silver coin of the 6th century weighing 92.5 grains. *Obv.* Youthful male figure l. on dolphin; r. hand outstretched. *Rev.* Incuse square. (Purchased at the sale of the Pettit Coll., &c. at Sotheby's, London, Aug. 1851, lot 419.) This has been transferred to Iasus in Caria (I believe on the suggestion of Dr. Jan Six); but Mr. Head tells me that he doubts this attribution, and believes that it may be an early coin of Methymna, type Arion.

lyre that occurs on several specimens is possibly the lyre of Arion, but more probably is an emblem of Apollo. The kantharos of the autonomous coins (Pl. xxxvi. 12, &c.) and the Dionysos of the Imperial coins (Pl. xxxvii. 7) are significant types, for Dionysos was worshipped at Methymna, and the Lesbian wine was chiefly produced there; see e.g. Virg., *Georg.*, ii. 90:—

Non eadem arboribus pendet vindemia nostris
Quam Methymnaeo carpit de palmite Lesbos.

Ovid, *Art. am.*, i. 57:—

Gargara quot segetes, quot habet Methymna racemos.*

Pausanias (x. 19) relates a story of Methymnaean fishermen dragging up in their nets a *xoanon* of olive-wood, which was pronounced by the Delphic oracle to be Dionysos *Κεφαλλήν*. The people of Methymna thereupon offered sacrifices to it and sent a bronze copy to Delphi.† In an inscription from Methymna,‡ the words *ἐν τοῖς Διωνυσίοισι πρὸ τᾶς τῶ ἀγάλματος περιφορᾶς* probably allude to this primitive image of the god. Curiously enough, among the Dionysiac types that frequently occur on the coinage of Methymna the famous *xoanon* is never seen. An archaic simulacrum of Dionysos is, however, a familiar type on the coins of Mytilene (see Pl. xxxviii. 15, &c., and *supra*, under Mytilene).

The Imperial coinage is much less extensive and varied in type than at Mytilene. The chief types relate to Dionysos, Athena, and the famous musician Arion, a native of Methymna (*circa* b.c. 625). Arion first appears (Pl. xxxvi. 15) on a silver coin (b.c. 330-240), and is throughout represented riding on a dolphin. He wears a long chiton and holds in one hand his lyre, while the other hand is outstretched and sometimes holds a plectrum. The bronze mou-

* Cp. Plehn, *Lesb.*, p. 7; Newton, *Trav. in Leont.*, i., p. 111.

† Cp. Welcker, *Griech. Götterlehre*, ii., p. 601.

‡ S. Reinach in *Bull. corr. hell.*, vii., p. 37 ff.

ment of Arion on Taenarum likewise represented him riding on a dolphin (Hdt., i. 24; Paus., ix. 30, 2).

ÆGIRUS, ANTISSA, ERESUS, &c.

Ægirus was a Lesbian *κώμη* mentioned by Strabo, xiii., p. 617:—

ÆGIRUS. ἐν δὲ τῷ μεταξύ Μισυλῆης καὶ τῆς Μηθύμνης κατὰ

κώμην τῆς Μηθυμναίας καλουμένην Ἀἰγεῖρον στενωπότην ἐστὶν ἡ νῆσος, ὑπέρβασιν ἔχουσα εἰς τὸν Πυρραίων Εὐριπον σταδίων εἰκοσιν. Lolling* supposes it to have been situated on the east coast near the modern village of *Mistegna*.† Dr. Imhoof-Blumer (*Monn. gr.*, p. 276) attributes to Ægirus (on grounds of type and style) the following bronze coin, of the end of the fourth century B.C. :—

Obv. Head of Athena l., helmeted.

Rev. ΑΙΓΙ Female head l., wearing stephane, earring and necklace. Æ. 9 millimètres.

The site of Antissa is shown by Koldewey‡ to have been in the small peninsula of *Tchifut-Kalesai* (*Ovriokastron*), west of Methymna, on the north coast of the island. It was previously supposed to be near Cape Sigrum on the west coast. Antissa joined the Mytileneans in their revolt against Athens in B.C. 428, but in the earlier part of the fourth century belonged to the Athenian league. It was destroyed *circa* B.C. 167 by the Romans, after the defeat of Perseus King of Macedon, to whose admiral, Antenor, the city had given supplies. The inhabitants were removed to Methymna (Livy, xlv. 31).

Brandis (p. 450) assigns to Antissa various pieces among the oldest billon currency of Lesbos, but the only certain coins of the

* In Koldewey's *Lesbos*, p. 34.

† Cp. Lolling in *Mittheilungen arch. Inst.*, xi., p. 288; Conze, *Lesbos*, p. 18 (at Kavakli); Newton, *Trav. in Levant*, I, p. 110.

‡ *Die ant. Baureste der Insel Lesbos*, p. 19; pl. 6, 7.

place are specimens in bronze, which do not seem to be older than *circ. B.C.* 300 (Pl. xxxv. 11-14). This coinage cannot have continued beyond *circ. B.C.* 167, when the inhabitants were transferred to Methymna. Among the coins bearing on one side the name and characteristic type (Arion) of Methymna are small bronze specimens (Pl. xxxvii. 1) with the obverse type of Antissa—bull and club (cp. Pl. xxxv. 14 *obv.*) These must have been struck at Methymna *circ. B.C.* 167, under the influence of the immigrants from Antissa.

The curious head that occurs on most of the coins of Antissa (Pl. xxxv. 11, 13 *rev.*) was considered by Francis Wise (whose conjecture is approved by Eckhel, *D. N. V.*, ii. 501) to be that of Orpheus. The head of Orpheus—of oracular potency—and his lyre were borne across to Lesbos—"down the swift Hebrus to the Lesbian shore,"—and the grave wherein the head was buried was shown at Antissa.* Against this ingenious suggestion it must be urged that the head-dress is not of the peculiar (Thracian) kind usually worn by Orpheus, but has rather a Persian appearance. Imhoof-Blumer (*Griech. M.*, p. 633), Gardner (*Types*, Pl. xv. 12), and Head (*H. N.*, p. 485) suppose the head to be that of Dionysos—a reasonable though not certain identification. The figure of Apollo with his lyre (Pl. xxxv. 14) may serve to recall to us the fact that the musician Terpander was a native of Antissa.

Eresus—one of the smaller of the principal Lesbian towns—was situated on the west coast of the island, south of
ERESUS. Cape Sigrum. The acropolis is on the summit of a rock rising straight out of the sea, and in the modern *Ereso* and its neighbourhood are considerable remains of the ancient town.† Eresus was on the side of Mytilene at the time of the revolt against

* Pfluh, *Lesbiac.*, p. 139.

† Conze, *Lesbos*, p. 27 ff.; Koldewey, *Lesbos*, p. 22 f.; plates 8, 9, 10.

Athens in B.C. 428, but in the earlier part of the fourth century B.C. belonged to the Athenian league.

The coins are bronze, struck *circa* B.C. 300-200 and perhaps later, and Imperial bronze.* The chief types of the autonomous series consist of a head of Hermes and an ear of corn (Pl. XXXVI. 1-4). The excellent quality of the wheat of Eresus was celebrated in antiquity. Archestratus (ap. Athen., iii. III), in a passage which strikingly illustrates the coin-types, declares that if the gods eat bread, they send Hermes to buy it at Eresus.† Sir Charles Newton, writing in 1852, describes the rich land of the valleys about Ereso abounding with corn and wine, and says that he tasted excellent bread there.‡

Theophrastus, the pupil of Aristotle, was a native of Eresus, and according to some accounts it was the birthplace of Sappho, who is represented on its Imperial coins.§

Nape. Stephanus Byz., s.v. *Νάπη*, has the notice:—*Νάπη πόλις Αἰσβου—ὁ πόλιτις Ναπαῖος καὶ Ἀπόλλων Ναπαῖος*. Strabo (ix., p. 426) speaks of *Νάπη ἐν τῷ Μηθύμνης πεδίῳ*. The ancient oracle of Apollo *Ναπαῖος* in Lesbos is mentioned by the scholiast on Aristoph., *Nubes*, 144 (cp. Macrob.,

NAPE.

Μηθύμνης πεδίῳ. The ancient oracle of Apollo *Ναπαῖος* in Lesbos is mentioned by the scholiast on Aristoph., *Nubes*, 144 (cp. Macrob.,

* The Imperial series of Eresus is very imperfectly represented in the British Museum. For other specimens, see Mionnet; Fox, *Engravings, &c.*, ii., nos. 60, 61; *Zeit. f. Num.*, xii., p. 314. For inscriptions of Eresus, see Cichorius in *Mittheilungen des deut. arch. Inst. in Athen*, xiv., pp. 259, 260; Couze, *Lesbos*, p. 30; *Bull. corr. hell.*, iv., p. 442, &c.

† Plehn, *Lesb.*, p. 6; Couze, *Lesbos*, p. 27; Lacroix, *Iles de la Grèce*, p. 209; *Éléa. Mus.*, n. f. xi., p. 214.

‡ Newton, *Travels in the Levant*, i. 98, 99; Couze, however (*Lesbos*, p. 27), speaking of his visit made a few years after Newton, says that the bread he had at Ereso was conspicuously bad.

§ Dumersan, *Hauterocèle Vell.*, pl. xiv., no. 2=Büchner, *Zeit. für Num.*, ix., pl. iv. 7; p. 116 (coin of Commodus with head of **CAΠΦΩ**); Imhoof-Hlumer *Mom. gr.*, p. 278; Büchner, *Z. f. N.*, ix., p. 116; pl. iv. 9 (Sappho (**ΣΑΦΦΩ**), seated playing lyre). On Sappho, see further under Imperial coins of Mytilene.

i. 17, 45), and the sanctuary of this Apollo is, in all probability, to be recognized in the ruins at *Kolundado*,* south-east of Methymna.

Imhoof-Blumer (*Monn. gr.*, p. 280; pl. E. 32) attributes to Nape a bronze coin of the fourth century B.C.:—

Obv. Head of Apollo l., laur.

Rev. [N]ΑΓΑΙΩΝ Owl; in front, astragalus.

Pyrrha was on the coast of the bay of Kalloni. Remains of the ancient city are described by Newton (*Trav. in*
PYRRA *Levant*, i., p. 91 f.), Conze (*Lesbos*, p. 44 f.), and Koldewey (p. 27 f.). Pyrrha was on the side of the Mytileneans at the time of their revolt from Athens, B.C. 428, but in B.C. 369-68† belonged to the Attic maritime league. Its coins are bronze pieces of fourth century style, and may have been first issued about B.C. 369.‡

The female head (Pl. xliii, 5) resembles the head of Aphrodite (7) on the electrum of Mytilene (Pl. xxxiii, 5, 6, 7). The temple, of which ruins exist at *Messa*,§ and which in all probability lay within the territory of Pyrrha, is supposed by Lolling||—though, as he admits, on slender evidence—to have been dedicated to Aphrodite.

Pyrrha probably ceased to be of importance at least as early as the second century B.C.,** and in Strabo's time no longer existed, though the *προίστειον* was still inhabited.

* Koldewey, *Lesbos*, p. 35 f.; p. 43 f., and Lolling's remarks there.

NESOS, PORDOSILENE.

Nesos was an island of the Hecatonnesi, a group lying between Lesbos and the Mysian coast. It is identical with
NESOS. the modern *Μοσχονήσιον* or *Νησί*, the largest island of the group.* On Nesos was a town of the same name now called *Μοσχονήσιον* or *Νησί*. Nesos occurs in the list of the tributaries of Athens in B.C. 425, but in the time of Strabo (xiii., p. 619) it was deserted. The coins are silver and bronze of the fourth and third centuries B.C. (Pl. xliii. 7-12); and many of them bear the head of Apollo, who had a temple in the island.

The coins were formerly assigned to Nape and to Nesiope, and the present attribution is due to Dr. Imhoof-Blamert and M. Earinos.†

Pordosilene was an island—with a town of the same name—
PORDOSILENE. belonging to the Hecatonnesi. Several writers have identified it with *Moschonnision* (or *Nesi*), but M. Earinos‡ has shown that *Moschonnision* is the ancient Nesos, and that Pordosilene must be looked for in the island now called *Pyrgos*, lying to the west of *Moschonnision*.

The coins are autonomous silver and bronze, and Imperial bronze. Their legends confirm the statements of Strabo (xiii. p. 619) and Stephanus,|| that the name was changed from Pordosilene [on

* Earinos, *Μουσείοι και Βιβλιοθήκη της εὐαγγελικῆς σχολῆς* (Σμύρνα, 1876), '1875-1876,' p. 110 ff.; p. 145.

† *Z. f. N.*, iii. 312 ff.

‡ *Op. cit.*, p. 122.

§ *Μουσείοι και Βιβλιοθήκη της εὐαγγελικῆς σχολῆς* (Σμύρνα, 1876), '1875-1876,' p. 141 f.; cp. Imhoof-Blamert, *Monn. gr.*, p. 281.

|| Steph. Byz., s.v. Πόρδοσιλήνη: τινὲς δὲ ἀκατάστατοι τὸ ὄνομα τοῦ ἑσπέρου Πόρδοσιλήνην ἐκάλεσαν. On the Imperial coins in the Brit. Mus. the name is spelt Πόρδοσιλήνη, but the usual reading is Πόρδοσιλήνη, see Mionnet, and Waddington, *Asie-mineure*, p. 70.

the coins, Pordosilene] to Poroselene. Pordosilene is mentioned in the list of Athenian tributaries *n.c.* 425, and it is to this period that the silver coin in Pl. xliii. 13 may possibly belong, though it is perhaps safer to ascribe it on grounds of style to a date nearer *n.c.* 450. The head may be that of the Apollo called Ἑκατος, after whom (according to Strabo) the Hecatonnesi were named.

The dolphin on the bronze coins (Pl. xliii. 14) may be a symbol of Poseidon, who occurs on an Imperial coin of the place.* The dolphin-type is also found at Nesos, where, however, it would rather seem—from the lyre beside it—to be connected with Apollo (Pl. xliii. 9, 10; *cp.* 8, 11). Mionnet (*Sup. v.*, p. 491, no. 1245) describes (after Sestini, *Mus. Arigoni*) a coin of Poroselene of Faustina II. with the type of a dolphin, in which is a hook; and Cavedoni (*Spicil.*, p. 147), assuming (perhaps too readily) that this description is accurate, recalls the curious statement of Pausanias (iii. 25, 5) that he had actually seen at Poroselene a boy riding on a dolphin, the gratitude of which the boy had earned by healing a wound inflicted on it by some fishermen. Aelian (*Hist. nat. anim.*, ii. 6), citing Leonides of Byzantium as an eye-witness, gives a still more elaborate account of the tame dolphin of Poroselene—ὁ τοῖνυν δελφίς ὡς μὲν πατρίδα ἐφίλει τὴν Ποροσελήνην. Similar stories are told of a boy of Iasus,† and of a boy who used to ride a dolphin on the Lacrine Lake,‡ and it is difficult to determine how far they rest on any basis of fact, and how far they are mere legends—like the story of Arion.

The types of the Imperial coins chiefly relate to Asklepios.

It will, I trust, be found that in the Introduction and Notes to the present volume I have given due references to all the modern

Severus Alexander.			
62	Æ 9	ΑΥΚΜΑΥΣΑ ΛΕΙΑΝ ΔΡΟΣ Bust of Severus Alexander r., laur., wear- ing paludamentum and cuirass.	ΑΒΥΔΗ ΝΩΝ Poseidon, wear- ing chlamys over shoulder, standing r., with l. foot on rock (or prow); in r., trident, in l., dolphin.

* This subject is also represented on the coins of Sestos (Brit. Mus. Cat., *Trajanic Coins*, &c., p. 200, no. 18; Von Sallet, *Beschreibung*, t. p. 274, no. 46). On some specimens, Eros is seen flying, holding a torch (*Das kaiserl. Münzkabinet*, no. 884, Abydos; Von Sallet, *Beschreibung*, l. p. 274, no. 46, Sestos). Eckhel (*Doct. num. vet.*, II, p. 479) compares Statius, *Sylv.*, l. 2, 87.

* As to the date of this coin and of nos. 23 and 24, see "Introduction" under "Alexandria Troas." On the earliest tetradrachms of this class, those of years '137' and '141' (*Rev. Num.*, n.s. iv, 1859, p. 115, pl. iii. 3; Leake, *Num. Hell.*, "As. Gr.," p. 6), the monogram  does not appear, and instead of the magistrate's name written in full, are two names in monogram.  has been explained as an abbreviation of the town-name (ΑΛΕ), though it is curious that on the same coin the name should also be written at full length (ΑΛΕΞΑΝΔΡΕΩΝ). With the inser. ΙΜΙΘΕΩΣ on the coins compare the same form in a lapidary inscription referred to by Pullan in *Antiquities of Ionia*, part iv., p. 41.

<p>Minor," and (on the analogy of other specimens) assigns it to the period of Caracalla. (Cp. the gold coins of Macedonia, 3rd cent. A.D., in Brit. Mus. Cat. <i>Macedon</i>, p. 21.) Our British Museum piece would appear to belong to the same period. The chief reason for attributing it to Alexandria Troas is the presence of the feeding horse, but I may also notice that it was purchased (from M. S. Sava in 1880) with 27 coins, most of which were of the Troad. The specimen is pierced, and may have been worn as an amulet like other gold pieces of the same class (cp. Lenormant, <i>Le monnaie dans l'ant.</i>, i., p. 39 ff.). Cp. also Babalon, <i>Rev. Num.</i>, 1885, p. 28.</p>

* Compare no. 66 *infra*, and a colonial coin of Parium, Brit. Mus. Cat. *Mysia*, p. 106, no. 108.

† Cp. no. 121 *infra*.

‡ Originally published in *Nouv. Cléon.*, n.s. xiii, p. 129.

§ This specimen is of brass, and about double the thickness of the ordinary coins of Alexandria Troas. It has the appearance of what in modern numismatics is called a *piec-fort* or *trial-piece*, and was probably never intended for circulation. Compare also no. 38 *supra*. We may find instances of similar trial-pieces at Apamea in Phrygia (specimens in Brit. Mus.), and at Heraclea in Bithynia (Brit. Mus. Cat., *Pontus, &c.*, p. 145, no. 46). Various ancient coins struck in lead doubtless belong to the same category; for example, a specimen described in B. M. Cat., *Pontus, &c.*, p. 48, no. 4, with the types of the gold stater of Asander, King of Bosporus.

6	Æ 45	[Pl. VIII. 4.]	
7	Æ 45		
<p>* H. P. Borrell (<i>MS. Cat.</i> in Brit. Mus., p. 97), Brandis (p. 411), and Head (<i>Hist. num.</i>, p. 470) attribute an electrum coin to Biryttis with obv. Young male head in pileus between two stars, rev. Female head. Specimens of this coin are in the British Museum, and are described <i>infra</i> under Lesbos, and figured in Pl. xxxiv. 12, 13, but I hesitate to separate them from the other electrum pieces of the large and varied "Lesbian" class.</p>			
<p>† No. 1, from the collection of C. G. Huber (<i>Sale Cat.</i>, London, 1882, lot 541), was found in the Troad, No. 3 is from the collection of H. P. Borrell, who states (<i>MS. Cat.</i>, p. 97) that he and others had acquired coins of these types in the Troad.</p>

4	12.1	.AR .3		
5	8.6	.AR .3	(type r.) [PL. VIII. 8.]	(incuse square of rude form.)
6	4.4	.AR .2	(")	(" " ")
<p>* Brandis (pp. 389, 411, 416) attributes to Cebren various electrum coins having the types of a ram's head and two rams' heads, but the attribution seems very doubtful. With regard to the silver coins assigned in this <i>Catalogue</i> to Cebren, the attribution only of nos. 7, 8, 11, 12, 13 can be considered as certain, the attribution of the other specimens (which from their provenance are certainly Asiatic) being probable though conjectural. I have not ventured to include certain silver coins having on the obverse a ram's head, and on the reverse the gorgoneion (<i>Nomismatische Chronik</i>, 1886, p. 255, no. 8; <i>B.</i> 1889, p. 258, no. 29), a calf's head (<i>N. C.</i> 1886, p. 255, no. 7), a lion's head (<i>N. C.</i> 1890, p. 237, no. 29), and griffin's head (<i>B.</i> 20 bis, 30), chiefly because these specimens seem to interrupt the series of Cebrenian (or supposed Cebrenian) coins which have merely an incuse square (without type) on the reverse.</p>

22		Æ .4		

* This coin (acquired by the British Museum in 1868) was procured by Sir C. T. Newton in 1856, together with a number of coins chiefly of Western Asia Minor and Lesbos. I find it classed in the Museum trays to Cehren, to which town the types would be suitable. The attribution must, however, be regarded as doubtful, more especially as the specimen bears considerable resemblance to the small silver coins that Dr. J. P. Six assigns to Andymon, King of Salamis in Cyprus (*Nouv. Chron.*, 1890, p. 256; pl. xvii. 10-12; cp. Babelon, *Persis achéménides*, p. cxx.).

29	Æ 1		
30	Æ 1 1/2		

* On the River Rhodios, see H. G. Lolling in *Mittheilungen des deutschen arch. Inst. in Athen*, 1881, p. 219.

† Purchased at the Thomas sale (1844), lot 2128.

‡ A similar type occurs on coins of Ilium (see *Zeit. f. Num.*, xvii., p. 9, no. 2; pl. I. 15 (Loebbecke Coll.), and *op. infra*, "Ilium," Pl. xii. 4). It is doubtful, from our specimen, if Ganymede holds a bow in his right hand as described by Loebbecke and others. On the relation of this type to other ancient representations of the subject (the bronze statue of Leocarchus, &c.), see Overbeck, *Griech. Kunstmythologie*, II., p. 529.

§ Prof. Percy Gardner (*Types*, p. 79, pl. xv. 7, and *Num. Chron.*, 1896, p. 256; pl. xi. 6) describes the figure carried by Aeneas as the archaic simulacrum of a divinity seated on a throne. The analogy of other representations of the flight of Aeneas on coins (Ilium, *infra*, Pl. xii. 2; Scopis, *infra*, Mamasa) and other monuments (e.g. Roscher, *Lexikon*, I., p. 193) renders it more likely that Anchises is intended. The object described by Prof. Gardner as the back of the throne or seat appears to us to be only the edge of the himation passing over the head of the figure.

11	217.8	AR 1	Janiform head of fine style (bearded male head l., laur., female head r., wearing stephane and circular earring). [Pl. xvii. 6.]	TENE ΔΙΟΝ Double-axe; on l., bunch of grapes: incuse square. on r., lyre.
12	200.3	AR 1.1	[Pl. xvii. 7.]	(TENEΔΙΟΝ) in field, A N ; on r., bee.
13	53.8	AR 6	(with necklace). [Pl. xvii. 8.]	(TEN[E]ΔΙΟΝ) on r., Nike l.

* Two female heads would seem to be represented on the obverse as on contemporary coins of Lampascus (Wroth, *Cat. Mysia*, pl. xviii. 9—11). The reverse-type of this specimen has been described by Brandis (p. 390), and Head (*Hist. Num.*, p. 476), as a bearded head. The coin is worn and the beard is not distinct: probably Athena is represented, as also on the coins of Lampascus just referred to.

CYME.				
<i>Seventh Century B.C.</i>				
SILVER.*				
			Fore-part of horse r.; beneath, inscription ($\overline{\alpha} \overline{\alpha} \overline{\beta}$).†	Incuse square containing ornamented star; beside it (as countermark), smaller incuse square containing a star of different design‡.
1	184	R .85	[Pl. XIX. 4.]	
2	183	R .8		
3	186-1	R .9	(double-struck: inset, not visible.)	
4	178-7	R .9		
<p>* As to ELECTRUM coins sometimes attributed to Cyme, see Introduction, <i>supra</i>, under "Cyme."</p> <p>† "Einzelne exemplare dieser Münzen haben unter dem Pferdetypos eine Aufschrift (scheinbar drei Buchstaben, von denen die letzten beiden —Δ^P oder —Δ gelesen werden könnten." Imhoof-Blinnar in <i>Zeit. f. Num.</i>, iii, p. 276.</p> <p>‡ Nos. 1—8 (cp. no. 9). Forty-one Aeginetic didrachms of the type occurred in the Santorin Hoard of 1821 (see Wroth in <i>Num. Chron.</i>, 1884, pp. 270—272). The coins here described are from the Payne Knight, Borrell, Woodhouse and Bank of England Collections, and are, in all probability, the actual specimens from the hoard. The attribution to Cyme (supported by Head, <i>Hist. Num.</i>, p. 479; <i>Catal. Ionia</i>, pp. xxxiii.—xxxv.) seems extremely probable, though it cannot be regarded as certain. The curious form of incuse appears to be peculiar to Asia Minor and the adjacent islands (see the archaic coins of Chios and Cos described by Greenwell in <i>Num. Chron.</i>, 1890, pp. 18, 19; pl. ii., 13, 16). Such an important centre of colonisation as was Cyme in early times can hardly have been without a currency, and it will be noticed that the half horse of these archaic coins occurs frequently on the later money of Cyme. It is right to point out, however, that the <i>earliest</i> inscribed coins of Cyme (nos. 10—13, struck about 480 a.c.) do not bear a horse but an eagle's head as their sole type.</p>

<p>* Cp. Mion., Sup. vi., p. 13, nos. 104, 106. The object of this countermark, probably, was to give the coin currency together with nos. 87—92 <i>infra</i>.</p> <p>† Coins of this class are here arranged (according to a suggestion of Mr. G. F. Hill) in three series, in each of which the hair is somewhat differently treated. In Series I. and II. the hair may be approximately described as being represented by vertical lines, and in III. by horizontal lines. In II. the hair is neater and less curly than in I. Other indications, such as the treatment of the wreath on the reverse and the general style of the coins, show that in all probability Series I. is somewhat earlier than II., and II. than III.</p>

Imperial Coinage.

(a. Without heads of Emperors.)

Time of Augustus? *

16	Æ 8	Head of Persephone (or Demeter) r., wreathed with corn: border of dots. (in front, letters?)	ΕΛ ΑΙΤΩΝ Athena, wearing helmet and chiton with diplois, standing r.; in r., owl; in l., spear. in field l., ΕΥ
----	-----	---	--

* The style of nos. 16-29 is not incompatible with an attribution to Pre-Imperial times, circ. B.C. 193-Augustus. If, however, the reading of Sestini (*Mon. Hellenic.*, ii., p. 145, no. 6 = *Mion.*, Sup. vi., p. 23, no. 193) may be trusted, a specimen with the reverse of our no. 16 has as its obverse the inscription ΑΙΟΥΙΑ CE ΒΑC (TH) and a head of Livia, "sub effigie Ceresis." Nos. 16-18 would therefore certainly belong to the reign of Augustus, and nos. 19-29 may also be conveniently assigned to the same time.

<p>* With the type compare Alexandrian coin of Trajan, Brit. Mus. Cat., <i>Alexandria</i>, p. 49, no. 407; pl. ii. 407. On an Alexandrian coin of Hadrian (<i>ib.</i>, pl. xxx., no. 906) a kalathos filled with poppies and corn occurs; the kalathos is ornamented with a representation of the Rape of Persephone; on each side of the kalathos is a torch. Cp. our Elacan coins of Domitian and Commodus.</p>			

No.	Metal. Size.	Obverse.	Reverse.
45	Æ 1·4	AVKMAVPH[ΛΙ] OC ANT[ΩΝΙ]NO Bust C of M. Aurelius r. [slightly bearded?]; wears paluda- mentum and cuirass.	ΕΠΙCΤΡ·ΠΕΛΛΩ ΝΙΟΝ ΝΕ [Ε]ΛΛΙ[ΤΩΝ] [ΟΥ*] Asklepios, wearing himation, stand- ing facing, looking l.; in r. hand, snake-encircled staff: on l., poppy- head and two ears of corn on long stalks; on r., olive-tree. [Pl. xxvi. 3.]
L. Verus,			
46	Æ 6	ΛΟΝΚΙΟC· ΚΑΙCΑΡ Head of L. Verus† r., bare; [slightly bearded]. [Pl. xxvi. 3.]	ΕΛΛΙ ΤΩΝ Kalathos containing poppy-head and ears of corn.

* On another coin of the same strategos, Imhoof-Blumer reads **NEOY** (Monn. gr., p. 274, no. 236); F. Marx (*Mittheilungen des d. deutsch. arch. Inst. in Athen*, x., 1885, p. 22) reads the same inscription **NEOK** [ἀγοε]. The word **NEOV** is quite distinct on the present coin: on another coin of Elaia the inscription **ΕΠΙ CΤΡ·ΠΕΛΛΩΝΙΟΝ ΝΕ ΕΛΛΙΤΩΝ** occurs (*Mion.*, iii., p. 16, no. 95). On a coin of Aegae, p. 99, no. 27 *supra*, we find the inscription **ΕΠΙ·ΑΥΡ·ΠΩΛΛΙΩΝΟC ΤΡΙC ΝΕ ΟΥ** and on coins of Cyme the following legends occur:—**ΕΠΙ·ΑΥΡ·ΕΛΠΙΔΗΦΟΡΟΝ·ΝΕ·ΚΥΜΑΙΩΝ** (*supra*, p. 122, no. 162); **ΕΠΙ ΕΛΠΙΔΗΦΟΡΟΝ Ν ΚΥΜΑΙΩΝ** (*supra*, p. 116, no. 117); **ΕΠ·CΤ·ΑΥΡ·ΕΛΠΙΔΗΦΟΡΟΥ ΔΙC ΚΥΜΑΙΩΝ** (Loebbecke in *Zell. für Num.*, xii., p. 314); [**Ε**]ΠΙ CΤ·ΑΥ [**Ρ** ΕΛΠΙ] ΔΗΦΟΡΟΝ·Β·ΚΥΜΑΙ (*Mionnet*, Sup. vi., p. 25, no. 172). These coins of Cyme show that **NE** and **N** (evidently abbreviated from **NEOV**) are equivalent to **ΔΙC** or **Β**. In lapidary inscriptions **ΔΙC** or **Β** following a proper name indicate a person who bears the same name as his father (S. Reinach, *Traité d'épigraphie grecque*), thus, **ΕΛΠΙΔΗΦΟΡΟΥ ΔΙC = ΕΛΠΙΔΗΦΟΡΟΥ ΕΛΠΙΔΗΦΟΡΟΥ**. **NEOC** must therefore have the signification of "junior," "the younger." Compare **ΦΑΥCΤΕΙΝΑ ΝΕΑ CΕΒΑCΤΗ** on coins of Faustina the Younger struck at Amastria (Wroth, *Cat., Pontus*, p. 88, no. 30) and at Nicomedia (*op. cit.*, p. 182, no. 22).—In the inscription of the coin of Aegae (*supra*, p. 99, no. 27) **ΕΠΙ·ΑΥΡ·ΠΩΛΛΙΩΝΟC ΤΡΙC ΝΕΟΝ**, the word **ΤΡΙC** appears to indicate that Pollio bore the same name as his father and grandfather (*cf.* Reinach, *op. cit.*, p. 500).

† Coins of this type were formerly attributed to Lucius Caesar, the adopted son of Augustus. On the attribution to Lucius Verus, see Imhoof-Stimmer, *Monn. gr.*, p. 274, no. 235, and Pick in *Z. f. N.*, xvii., p. 192 f.

5	Æ 4		(Λ A P bunch of grapes and symbol on r. not visible.)

* These coins with the amphora type seem to belong to this Larissa rather than to any other place of the same (cp. Dumersan, *Rev. num.*, ix., p. 28 E.; pl. iii.). No. 3 was purchased by the British Museum in 1880 together with 26 other Greek coins, most of which were of the Troad. Of the Larissa in the Troad there seem to be no coins extant. Dr. Imhoof-Blumer further assigns to Larissa Phriconis bronze coins having the reverse-type of a bull, and points out that they resemble the money of Bocone (*Mon. gr.*, p. 275). The bronze coins with obv. Head of Apollo, rev. Horseman, assigned by Borrell and Ramsay (*Jour. Hell. Stud.*, ii., p. 283) to this Larissa, are better attributed to the Ionian Larissa, on account of their resemblance (noted by Dr. Imhoof-Blumer, *Mon. gr.*, p. 239) to the coins of Colophon.

MYRINA.				
<i>Second and First Centuries B.C.</i>				
SILVER.				
Series I.				
			Head of Apollo of Grynium r., wearing laurel-wreath with ends falling behind.	ΜΥΡΙΝΑΙΩΝ Apollo of Grynium, wearing laurel-wreath and himation which leaves upper limbs bare, standing r.; in r., patera; in l., laurel-branch to which two fillets are attached; before him, omphalos and amphora: the whole in laurel-wreath.*
1	358.8	AR 1.35	[Pl. xxvii. 1.]	in field I, 
2	253.4	AR 1.25	[Pl. xxvii. 2.]	" " 
3	359.	AR 1.4		" " 
4	58.5	AR .7	[Pl. xxvii. 3.]	" "  [DRACHM.]
<p>* The tetradrachms and drachms of this class are here grouped in three series, according to the differing modes in which the hair of Apollo is treated. In Series I. the hair falls in natural ringlets. In Series II. it is arranged in formal curls, and in Series III. it falls in thin, straggling ringlets. No. 6 is transitional between Series I. and II., for it has the formal curls of Series II., but the monograms on its reverse are identical with those of the drachm no. 5, which has the hair in natural ringlets. With regard to the style of the coins, especially as displayed in the heads of Apollo, it will be seen that the specimens in Series III. are decidedly worse, and therefore presumably later, than those in Series I. The coins in I. are of good style, while II. contains pieces some of which resemble the well-executed coins of I. and some which resemble the poorly treated coins of Series III.</p>

* 1-3. These coins are usually attributed (e.g. by Leake and Head) to Temnus. No. 3 was purchased in 1841 of Mr. Burgon, who in his MS. Catalogue assigns it to Temnus. The close resemblance of the coins in style and fabric to 4th century Æ of the island of Naxos (Wroth, *Cat., Crete and Dodecan Islands*, pl. xxv. 11) is remarkable.

* With the types compare the coins of Cyme (*supra*, p. 117, nos. 118-120) and Myrina (*supra*, p. 139, no. 41).

† Coins of the same flat fabric as nos. 18-23 and with similar representations occur at Smyrna and are assigned by Mr. Head (*Cat. Ionia*, pl. xxvii.) to the period of Trajan—Commodus. I venture to think that most of the Smyranean coins in question and those of Temnus, nos. 18-23, are of a later time, and that they belong to the age of Valerian and Gallienus. The female head on no. 18 of Temnus, in fact, resembles that on a coin of Erythrae and Olus (*Cat. Ionia*, p. 150, no. 274; pl. xxxviii. 11.) assigned by Mr. Head to the age of Valerian (*op. cit.* also *Cat. Ionia*, p. 318, nos. 65, 66, time of Valerian and Gallienus).

29	Æ 8		
		<p>* C. Asinius Gallus, son of the well-known Asinius Pollio, was Proconsul of Asia A.D. 748-49 = B.C. 6-5. (See Waddington, <i>Fastes</i>, no. 58, and the article "Les portraits des proconsuls d'Asie et d'Afrique sur les monnaies" in his <i>Mélanges de num.</i>, ii., p. 133 ff.; cp. Mommsen in <i>Zeit. für Num.</i>, ii., p. 69 L, and L. Müller, <i>ib.</i>, p. 295 f.) "Ἄγρός, ἄγρεια, sont des mots qu'on trouve souvent dans les inscriptions honorifiques appliqués aux magistrats romains, par exemple à Tioa, τὸς ἄγρὸς δικαιοδότης (<i>Corymb. inscr. gr.</i>, 2631, 4240); comme en latin, integerrimo et sanctissimo praesidi." Waddington (<i>Fastes</i>, no. 58, p. 96).</p> <p>† The last three letters are not distinct on these specimens, but Dr. Von Sallet (<i>Z. f. N.</i>, xii., p. 361 f.) states that two examples of the coin in the Berlin collection read ΥΠΑΤΗΑC (the H has the form Η). According to Von Sallet, ἑνεργία = ενεργία = consulatus: "der Genetiv ελευσίου ενεργίας ist wie ἐνεργησίου ἐλευσίου mit der Kaisernamen zu verbinden; ελευσίου heisst reich, vornehm, also die ganze Titulatur bedeutet 'Caesar Augustus mit der hohen Consulatswürde bekleidet.'" "</p>

* Cp. *Nouv. Chron.*, 3rd ser., vol. II., p. 227, with **AE** (Imhoof Coll.)
† Nos. 31, 33, 34, 37 have a linear border as well as the incuse square on the reverse, and a merely mechanical arrangement would place them in Series III., which has a linear border as well as the incuse. The style of the obverse of nos. 31, and perhaps 33 and 34, seems, however, to require that the coins should be placed in Series II. rather than with the coins of Series III. I am inclined to place no. 37 in Series II., though it may possibly belong to Series III.

* Procured by Sir C. T. Newton in 1856. The serpent before the head on nos. 113, 114, and the reverse type of nos. 115, 116, would seem to indicate that by the bearded head Asklepios is intended. The serpent is not necessarily, however, a part of the type, for on nos. 85-89 it appears to be a mere symbol or mint-mark, and not an attribute of the divinities represented.

† From the Thomas Collection = Thomas Sale Cat., 1844, lot 3025 = Dameran, *Allier Coll.*, pl. xiv., fig. 24.

UNCERTAIN MINTS OF LESBOS.*				
SILVER.				
<i>Circ.</i> n.c. 500—440.				
1	25·7	AR ·5	KI Θ ? (inser. obscure) Two boars' heads facing one another. [Pl xxxv. 7.]	Quadrupartite incuse square.
			Two boars' heads facing one another.	Incuse square divided diagonally.
2	23·8	AR ·5	[Pl xxxv. 8.]	
3	19·9	AR ·5		

* Nos. 1 and 2 are from the Collection of Mr. H. P. Borrell, who classed them (*MS. Catal.*) to Methymna without noticing the inscription on no. 1. No. 3 was presented by Mr. J. Doubleday in 1841; no. 4 was acquired in 1855; no. 5 is from the Bank of England Collection, and is described in Borrell's *MS. Cat.* of that Collection as "uncertain." Coins similar to nos. 1 and 2 are published by Dr. Imhoof-Biumer, *Moen. gr.*, s.v. "Kithos?" p. 277, no. 245 [where for *Æ* read *AR*], pl. 2, no. 36; and no. 246, pl. 2, no. 27 (Cab. de France). The exact provenance of the coins is unknown, but the type of the boars' heads on our nos. 1—4 renders their Lesbian origin almost certain. The base metal and the "eye" type of our no. 5 and of *Moen. gr.*, no. 246, have led Dr. Imhoof to attribute the coin to a town of Lesbos or to one of the Hekatoonesoi. The inscription on *Moen. gr.*, no. 245, is **KIOI** (or **KIOI** P), though it is obscure on our corresponding no. 1. The inscription on *Moen. gr.*, no. 246, is given by Dr. Imhoof as **KIO**, but the letters on our corresponding no. 5 are extremely obscure.

6	20·3	AR ·4		

* A similar projection is found on the helmets represented on early vases: see Greenwell in *Nuss. Chron.*, 1893, p. 91.

† No. 6 was presented to the British Museum in 1891 by Mr. H. Montagu, F.S.A., and comes from a hoard discovered in Lesbos and referred to in *Nuss. Chron.*, 1892, p. 32 (Montagu); *ib.*, 1893, p. 90 (Greenwell). Specimens similar to our no. 1 and to our nos. 5, 6, 7, 8 occurred in this hoard, and the attribution of nos. 5, 6, 7, 8 to Methymna proposed by Mr. Montagu (*loc. cit.*) seems probable. Nos. 5 and 8 were purchased in 1892, and are possibly from the same hoard. No. 7, formerly classed to Tarsus, is from the Ivanoff Collection (Sale Catal., London, 1863, lot 519).

* The attribution of nos. 8—14 to Mytilene appears probable. Nos. 8, 9, 12 were procured for the British Museum by Sir C. T. Newton. Nos. 11 and 14 were purchased of H. P. Borrell, who in his MS. Catal. (p. 178, no. 105) states that no. 11 came from Mytilene. Borrell also states (*Num. Chron.*, vii., p. 53, no. 5) that there was a specimen in the Bank of England Collection, *obv.* Hd. of Apollo r., **R MYTI** Female head r. This coin did not come to the British Museum with the Bank Collection, nor is it described in the MS. Catalogue of the Bank coins. No. 13 was purchased (together with many other coins) of Maximilian Borrell in 1845, and in the British Museum registration book is assigned to Mytilene. It may be compared with a specimen in H. P. Borrell's Collection, described as follows in his MS. Catal., p. 102, no. 3:—" *obv.* Laureated head to the right, perhaps Apollo; **R MYTI** Female head to the right with earrings; before, a star; behind, **Y**."

* A vase containing some hundreds of Mytilenean bronze coins of this type was discovered in Lesbos at Karini, on the road to Ajsasu: see Koldewey, *Lesbos*, pp. 40, 41. Dr. Dressel (cited in Koldewey, *op. cit.*, p. 41) considers that the coins are not earlier than a.c. 200. It is quite possible that he may be right, though I am myself inclined to place them in the period a.c. 250—200. The arrangement of the inscription and the form of the lyre seem to connect the coins with the earlier rather than with the later bronze money of Mytilene. It must also be borne in mind that, even when we set aside these Apollo and Lyre coins, there remains an abundant bronze coinage for the period subsequent to a.c. 200.

159	Æ · 85		
160	Æ · 85	(the first letter has the form Θ)	
(For another coin with the head of Theophaues, see p. 201, no. 175 <i>infra</i> .)			
<p>* Nos. 158—185. For an account of the personages represented on this series of coins, the reader is referred to the Introduction, <i>supra</i>, "Mytilene, Imperial Coinage." The chronological arrangement is determined as follows: Nos. 158, 159, 160 resemble the coins of Tiberius [and Livius, see <i>infra</i>]. Nos. 161, 162 bear a head resembling Matidia the niece of Trajan. The heads on the coins assigned to the period of the Antonines, nos. 164—169, offer some resemblance to the elder Faustina; while nos. 173, 174 recall the heads of the younger Faustina, of Lucilla and Crispina. The lyre on the reverse of no. 170 resembles that on no. 169. The attribution of 176 and 176 to the time of Sept. Severus and family is more doubtful; however, a reverse nearly resembling that of 175 appears on a Mytilenean coin of J. Demna described <i>infra</i>, and 176 is assigned to this period because of the likeness of its obverse type to the head of young Geta on a coin of Oyzicus (Wroth, <i>Cat. Myria</i>, pl. xiv. 4). Nos. 177—185 (not 184) are inscribed with the name of Valerianus Aristomachus, who appears as strategus on the Mytilenean coins of Valerian and Gallienus.</p>			

No.	Metal. Sigs.	Obverse.	Reverse.
Time of Matidia, niece of Trajan.			
		MVTI ΔΑΔΑ Female bust (resembling Matidia) r. (Dada?)*	ΠΑΝΚΡΑ ΤΙΔΗΣ Youthful male figure (Pankratides?), naked, standing l.; r. hand resting on column, round which a serpent is coiled; in l., chlamys.
161	Æ 85	[Pl. xxxix. 3.]	
162	Æ 8	[Pl. xxxix. 3.]	(ΠΑΝΚΡΑΤ[Ι] ΔΗΣ r. hand lowered; before him serpent; l. elbow resting on chlamys placed on column.)
163	Æ 9	ΠΑΝΚΡΑΤΙ ΔΗΣ† Youthful male head r., bare (Pankratides?). [Pl. xxxix. 4.]	ΜΥΤΙ ΔΑΔΑ (letters partly obscure). Female figure (Dada?), wearing chiton and peplos, standing l.; in r., short staff?; l., holds peplos.
Period of the Antonines.			
164	Æ 1-	ΛΕΣΒΩΝΑΣ ΗΡΩΣ ΝΕΟΣ Male bust r., beardless, wearing wreath of ivy-leaves and berries (Lesbonax in the character of Dionysos). [Pl. xxxix. 5.]	ΜΥΤΙΑΗ ΝΑΙΩΝ Female figure (Demeter?), wearing chiton and peplos, standing l.; in r., ears of corn?; l. holds long sceptre: before her, lighted altar ††
* The obverse legend of specimens of this coin has hitherto been variously read, e.g. as MVTI ΛΑΔΑ (Sabbatier in <i>Rev. belge</i> , 4th ser., i. 132); MATIDIA MYTI (Mion., iii. p. 51, no. 132, and Sup. vi., p. 66, no. 93). The British Museum specimens certainly read MVTI ΔΑΔΑ , and this also is the reading of an excellent example of no. 161 in the Bibliothèque nationale, Paris (acquired about 1840), of which M. Babelon has kindly sent me a cast.			
† The first eight letters of the inscription are obscure.

have been unable to ascertain where the original now is. M. E. Babelon, in answer to my inquiry, kindly tells me that it is not in the Bibliothèque nationale, nor can it be traced in the registers of that collection. Mionnet's specimen (judging from the cast) has undoubtedly been tooled in the legend, and this was perhaps the reason why he pronounced it to be false. The British Museum specimen (purchased in 1874 from MM. Rollin and Feuillant, of Paris) shows no signs of tooling, though there is a slight feebleness about the lettering. In style and fabric both specimens rather resemble Roman medallions than the large coins (so-called "medallings") struck in a Greek city. Thus they differ a good deal from another Mytilenean "medallion" of Hadrian described by Mionnet, iii., p. 5, no. 136 ("Diane chasseresse"). I was at first inclined to suspect that both specimens were the work of a 16th or 17th century artist, but Mr. Head strongly believes in their authenticity, and I quite admit the force of his argument that the coins (especially on the obverse) would seem to be too well executed to be the work of a modern imitator or forger.

INDEX I.

GEOGRAPHICAL.

In this Index and in the following Indexes, the Arabic numerals refer to the *page* in the Catalogue, and the Roman numerals to the *page* in the Introduction.

A.

- Abydus, 1; xi, xli.
Aegae, 95; lvii—lix.
Aegae and Myrina, 100.
Aegirus, lxxvii.
AIOAE, 171; lxxviii.
Alexandria Troas, 9; xiv—xix.
Antandrus, 33; xxxvi, xxxvii.
Antiochia [Cebren], 46; xx, xxi.
Antissa, 175; lxxvii, lxxviii.
Assus, 36; xxxiv—xxxvi.
Autocane, lxi, lxii.

B.

- Birytis, 40; xlv.
Bocone, 101; lxi.

C.

- Came, 102; lxii.
Cebren, 42; xix, xx.
Colone, 47; xxi.
Cyme, 104; xlix—lii.

D.

- Dardanus, 48; xlii—xliv.

E.

- Elaes, 125; lii—liv.
Eresus, 176; lxxviii, lxxix.

G.

- Gargara, 52; xxxvii, xxxviii.
Gentinus, 54; xlv.
Gergis, 55; xxix, xxx.
Grynium, 133; liv.

H.

- Hamaxitus, 56; xxii.

I.

- Ilium, 57, xxv—xxix.

L.

- Lamponia, 72 ; xxxviii.
 Larissa (Troad), xxii.
 Larissa Phreionis, 134 ; lx, lxi.
 Lesbos, ΑΙΟΛΕ, 171 ; lxxviii.
 Lesbos, Billon, 150 ; lxiii—lxv.
 Lesbos, Electrum, 156 ; lxy—lxviii.
 Lesbos, Kolmon, 169.
 Lesbos, Uncertain, 173.

M.

- Methymna, 177 ; lxxv—lxxvii.
 Myrina, 135 ; iv—lvii.
 Mytileno, 184 ; lxxviii—lxxv.
 Mytileno and Adramyteum, 214.
 Mytileno and Perga, 215.
 Mytileno and Pergamuna, 214.

N.

- Nape, lxxix, lxxx.
 Neandria, 73 ; xxiii.
 Neonteichos, 141 ; lxi.
 Neos, 217 ; lxxxix.

O.

- Ophrynum, 75 ; xxx, xxxi.

P.

- Pionia, 77 ; xxxix.
 Pordosileno, 219 ; lxxxix, lxxxii.
 Pyrrha, 216 ; lxxx.

R.

- Rhoeteum, xxxi, xxxii.

S.

- Scamandria, 79 ; xxxii.
 Scepsis, 80 ; xxiii—xxv.
 Sigeum, 86 ; xxxiii—xxxiv.

T.

- Temnus, 142 ; lix—lx. †
 Tenedos, 91 ; xiv—xiviii.
 Thymbra, 89 ; xxxiv.
 Tiana, 149 ; lxii.

U.

- Uncertain, Lesbos, 173.

Z.

- Zelaia, 90 ; xliv.

INDEX II.

TYPES.

A.

- Adramyteum, Tyche of, and Tyche of Mytilene.—Mytilene and Adramyteum, 214.
- Aegae, bust of City of.—Aegae, 97.
- Aegae †, the City of and Myrina †—Aegae, 100.

- Agrippina, sen., bust of.—Methymna, 181; Mytilene, 204.
- Agrippina, jun., bust of, as Demeter.—Cyme, 118.
- Agrippina, jun., bust of.—Mytilene, 205.
- Alcaeus.—Mytilene, lxx.
- Alexander, Severus, bust or head of.—Abydos, 7, 8; Alexandria Troas, 23—25; Ilium, 71; Scepsis, 85; Aegae, 99; Cyme, 120; Temnus, 148; Methymna, 183; Mytilene, 211.
- Alexander, Severus †, on horse.—Mytilene, 211.
- Alexandria Troas, bust of.—Alexandria Troas, 13—16, 32.
- Alexandria Troas, Genius of.—Alexandria Troas, 14, 17.
- Altar.—Alexandria Troas, 14; Cyme, 113; Elaea, 131.
- Altar, with serpent.—Assus, 39.
- Amazon †, foundress of Temnus.—Temnus, 145.
- Ammon.—See Zeus Ammon.
- Amphora.—Myrina, 135—137; lvi; Larissa Phriconis, 134; Lesbos, 153.
- Anymone † with Poseidon.—Cyme, 122.
- Anchises.—See Aeneas.
- Antaeus and Hercules.—Alexandria Troas, 22.
- Antonius, head of.—Mytilene, 206.
- Antonia, seated.—Ilium, 62.
- Antoninus Pius, bust or head of.—Antandrus, 34; Ilium, 64; Mytilene, 206.
- Aphrodite, standing.—Scepsis, 84.
- Aphrodite †, head of.—Lesbos, 162; Mytilene, 185, 188—191; lxxviii; lxxix; Pyrrha, 216; lxxx.

- Apollo, bust or head of.—Abydos, 2—4; Alexandria Troas, 9—12; Antandrus, 33, 34; Cebren, 45; Antiochia, 46; Gargara, 53, 53; Gentinus, 54; Hamaxitus, 56; Neandria, 73, 74; Aegae, 95, 96; Cyme, 113; Gryniun, 133; Myrina, 137, 138; Temnus, 143; Lesbos, 158, 160, 162, 164—166; Methymna, 181, 184—187, 192, 193; Nape, lxxix, lxxx; Nesos, 217, 218; lxxxii.
- Apollo, standing, holding branch.—Alexandria Troas, 14, 23, 24, 26; Aegae, 97, 98.
- Apollo, standing, holding lyre.—Antandrus, 34; Antissa, 175; Mytilene, 201.
- Apollo standing, hand raised.—Temnus, 143.
- Apollo on griffin.—Alexandria Troas, 27.
- Apollo Chresterios.—Aegae, lix.
- Apollo of Gryniun, head of.—Gryniun, 133; liv, lv; Myrina, 135—137.
- Apollo of Gryniun, standing.—Myrina, 135, 136, 139.
- Apollo of Gryniun in temple.—Myrina, 139, 140.
- Apollo Smintheus, statue or figure of.—Alexandria Troas, xvi—xix; 9, 11, 13, 16, 17, 20, 23, 24, 29, 30; Hamaxitus, 56; xxii.
- Apollo Smintheus, *Cavern of*.—Alexandria Troas, 13, 19, 21.
- Apollo Smintheus, statue of, held by Genius.—Alexandria Troas, 4, 14, 17.
- Apollo Smintheus, statue of, and bearded male figure.—Alexandria Troas, 13, 16.
- Apollo Smintheus, statue of, and Caracalla.—Alexandria Troas, 19—21.
- Apollo Smintheus, statue of, and Volusian.—Alexandria Troas, 38.
- Apollo Smintheus, statue of, and Valerian I.—Alexandria Troas, 29.
- Apollo and Zeus Ammon.—Mytilene, 208.
- Apollo†, head of.—Cebren, 44; Gargara, 52; Neandria, 73; Elaea, 128; Lesbos, 155, 162, 166, 174; Antissa, 175; Eresus, 176; Nesos, 217; Pordosilene, 219; lxxxii.
- Apollo† standing, with foot on rock.—Methymna, 182.
- Apollo† and Aegae†.—Aegae, 99.
- Apollo†, with Dionysos and Athena.—Methymna, 182.
- Archedamis, bust of.—Mytilene, 198; lxxxii.
- Ares†, head of.—Lesbos, 165.
- Arion on dolphin.—Methymna, 180, 181, 183; lxxvi; lxxvii.
- Artemis, bust or head of.—Abydos, 4—6; xi; xli; Zelaia, 90; xlv; Cyme, 113; Mytilene, 193, 197; lxix.
- Artemis, huntress.—Mytilene, 206, 209, 210, 213.
- Artemis, holding torch.—Mytilene, 205.
- Artemis riding stag.—Mytilene, 201, 208.
- Artemis grasping horn of stag.—Myrina, 140.

- Artemis in chariot.—Mytilene, 207, 212.
- Artemis in chariot, with bow.—Mytilene, 202.
- Artemis in chariot, with torch.—Mytilene, 202.
- Artemis, simulacrum of, resembling Ephesian Artemis.—Abydos, 7; Came, 102; Cyne, 119, 121, 123.
- Artemis and Cyne †—Cyne, 113.
- Artemis and Tyche of Mytilene.—Mytilene, 212.
- Artemis of Perga and Tyche of Mytilene.—Mytilene and Perga, 215.
- Artemis held by Tyche of Pergamum.—Mytilene and Pergamum, 214.
- Artemis Astyrene †, head of.—Antandrus, 33; xxxvii.
- Artemis †, bust or head of.—Antandrus, 34; Gentinus 54; Tenedos, 93; Lesbos, 164.
- Artemis † with Crispina †—Mytilene, 207.
- Ascanius.—See Aeneas.
- Asklepios, standing.—Antandrus, 34, 35; Aegae, 98; Came, 103; Cyne, 119; Elaea, 130, 131; liii; Pordosilene, 220.
- Asklepios seated.—Mytilene, 201, 206.
- Asklepios held by Tyche of Mytilene.—Mytilene and Pergamum, 214.
- Asklepios and Tyche of Mytilene.—Mytilene and Pergamum, 214.
- Asklepios and Hygieia.—Came, 102; Cyne, 122; Mytilene, 203.
- Asklepios †, head of.—Lesbos, 167, 168.
- Athena, bust or head of.—Assus, 36—38; xxxv; xxxvi; Colone, 47; Dardanus, 51; Ilium, 57—61, 64, 65, 69, 71; Pionia, 77; Sigeum, 86—88; xxxiii; Aegae, 95, 96; Cyne, 114, 115; Elaea, 125, 126, 123, 129; Myrina, 137, 138; Neunteichos, 141; lxi; Lesbos, 158, 159, 163, 164, 166, 167, 171; Methymna, 177—181, 183; lxxv; Pordosilene, 219.
- Athena, standing.—Ilium, 67—69, 71; Aegae, 97.

 Horse, fore-part of winged.—Scepsis, 82.
 Lyre.—Alexandria Troas, 9, 12; Lesbos, 169, 170; Methymna, 180; Mytilene, 189, 194, 195, 207.
 Mouse ♀—Alexandria Troas, 12.
 Oinochoe.—Ilium, 59.
 Owl.—Assus, 38; Scamandria, 79; Mytilene, 192, 193.
 Pallas.—See Athena.
 Rose.—Antissa, 175.
 Star.—Alexandria Troas, 12; Ilium, 61; Scamandria, 79.
 Star in incuse square.—Cyme, 104, 105.
 Δ.—Temnus, 144.
 ☾ Methymna, 182.

- Crab.—Scepsis, 81.
 Crescent.—Abydus, 3, 4; Sigeum, xxxiii.
 Crescent and pentagon?—Eresus, 176.
 Crescent and star. Tenedos, 94.

D.

- Dolphin.—Abydus, 2; Methymna, 179; Mytilene, 186, 189.
 Dolphin on trident.—Abydus, 6.

E.

- Eagle, head of.—Mytilene, 189, 190.
 Eagle.—Cebren, 45; Antiochia, 46.
 Eagle ♀—Mytilene, 186.
 Ear of Corn.—See Corn.

F.

- Fish-hook.—Mytilene, 190.
 Fly.—Ilium, 58.

G.

- Grain of corn.—See Corn.
 Grapes.—Abydus, 2, 5; Antandrus, 33, 34; Assus, 37, 38; Gargara, 52, 53; Scepsis, 83; Tenedos, 93; Larissa Phriconia, 134; Lesbos, 171; Antissa, 175; Eresus, 176; Methymna, 179, 180; Mytilene, 190, 194, 195.
 Griffin ♀, head of.—Abydus, 3.

H.

- Herakles.—Tenedos, 94.
 Hermes.—Tenedos, 94.
 Hook.—Mytilene, 190.
 Horse feeding.—Alexandria Troas,
 xiv.

I.

- Ivy-leaf.—Antandrus, 33, 34;
 Cyme, 107; Methymna, 181;
 Mytilene, 187, 193, 194.
 Ivy-spray.—Ophrynum, 75.

K.

- Kantharos.—Abydos, 2; Lamponia,
 72; Tenedos, 93; Methymna,
 178; Mytilene, 190.

L.

- Laurel-branch.—Abydos, 3.
 Lion, head of.—Assus, 87.
 Lyre.—Tenedos, 92, 93; Myrina,
 137; Antissa, 175; Mytilene,
 194; Nesos, 218.

M.

- Maak and thyrsos.—Mytilene, 194,
 195.

N.

- Nike.—Abydos, 3; Tenedos, 92.

O.

- Oinocha.—Mytilene, 185—187;
 190.
 Olive-branch.—Ilium, 57.
 Olive-spray †—Lesbos, 159, 160.
 Owl.—Dardanus, 48, 49; Ilium, 57,
 58; Tenedos, 94.

P.

- Palm-branch.—Abydos, 6; Ilium,
 58; Nesos, 217.
 Palm-branches.—Alexandria Troas,
 9.
 Palm-tree.—Gentius, 54.
 Pedum.—Mytilene, 187.
 Pegasus drinking.—Ilium, 58.
